## **Becoming Human Pb 1982:**

**Gender and the Life Course** Alice S. Rossi, 1985-01-01 Gender and the Life Course is an interdisciplinary collection of essays on the lives of women and men as they are affected by history culture demography economic and political stratification and the biopsychological processes that attend maturation and aging The book covers three major topics Part I which examines gender and the life course in broad historical perspective includes a summary of recent work in biological ecology and primatology and an analysis of the persistence of cultural and gender differences in role organization in societies undergoing the transition from agrarianism to industrialism Other essays trace the changes in sources of household income of industrial workers over the life span and review temporal and gender differences in life span transitions Part II examines gender differentiation in a variety of contexts psychological psychobiological and sociological Alice Rossi's ASA Presidential Address reviews recent work on fathering and mothering and argues that sociological explanations of such gender differences need supplementation by concepts from evolutionary theory and the neurosciences Three essays deal with gender and economy one shows how gender stratification took hold in the early stages of industrialization in France another demonstrates the persistence of gender stratification in modern economies the third focuses on ideology in relation to gender and political power Part III examines various aspects of the aged in contemporary society including an argument for an interpretive social science that uses diverse methods to improve our ability to describe and interpret many facets of the lives of elderly men and women a review of the methodology used to study changes in the aged population over time and an overview of existing data sets that permit further cohort and longitudinal analyses of the aged The final essays review social policies as they affect the elderly with particular attention to the fact that most very old people are women and the impact of the greatly expanded life course for family and kin relations Gender and the Life Course is a state of the art assessment of the best work currently being done on gender and age a s maturational factors and is essential reading for anyone interested in adult development and gender roles

*Mental Health and Well-Being in Animals* Franklin D. McMillan, 2008-06-02 The past few decades have seen a virtual explosion of scientific research in the area of cognition emotions suffering and mental states in animals Studies in the field laboratory and clinical medical practice have amassed an overwhelming body of evidence demonstrating that mental well being is of paramount importance in all aspects of animal care There is no longer any reasonable doubt among researchers that mental health is of equal importance as physical health and animal well being Recent research convincingly shows that physical health is strongly influenced by mental states thereby making it clear that effective health care requires attention to the emotional well being as well as physical Yet for its vast importance mental health in veterinary medicine has to date not been compiled and structured into an organized field or body of knowledge This information so critical to the formal establishment of the field of mental health and well being in animals remains scattered throughout a wide array of scientific journals This book represents the first authoritative reference text bringing together the

most up to date information in the variety of subjects comprising the field of mental health and well being in animals Bringing together a host of distinguished experts internationally noted in the fields of animal emotion research animal behavior cognitive science and neuroscience the book represents the first authoritative reference compiling the diverse information on the animal mind and combining the revolutionary advances in the cognitive sciences with the knowledge in veterinary medicine and clinical animal behavior This book takes a descriptive and proscriptive approach to mental health mixing the scientific research with practical information with clinical applications for veterinary health professionals to use in practice

**Sex and Friendship in Baboons** Barbara B. Smuts,2017-09-29 Those who have been privileged to watch baboons long enough to know them as individuals and who have learned to interpret some of their more subtle interactions will attest that the rapid flow of baboon behavior can at times be overwhelming In fact some of the most sophisticated and influential observation methods for sampling vertebrate social behavior grew out of baboon studies invented by scientists who were trying to cope with the intricacies of baboon behavior Barbara Smuts eloquent study of baboons reveals a new depth to their behavior and extends the theories needed to account for it While adhering to the most scrupulous methodological strictures the author maintains an open research strategy respecting her subjects by approaching them with the open mind of an ethnographer and immersing herself in the complexities of baboon social life before formulating her research design allowing her to detect and document a new level of subtlety in their behavior At the Gilgil site described in this book she could stroll and sit within a few feet of her subjects By maintaining such proximity she was able to watch and listen to intimate exchanges within the troop she was able in other words to shift the baboons well along the continuum from subject to informant By doing so she has illuminated new networks of special relationships in baboons This empirical contribution accompanies theoretical insights that not only help to explain many of the inconsistencies of previous studies but also provide the foundation for a whole new dimension in the study of primate behavior analysis of the dynamics of long term intimate relationships and their evolutionary significance At every stage of research human observers have underestimated the baboon These intelligent curious emotional and long lived creatures are capable of employing stratagems and forming relationships that are not easily detected by traditional research methods In the process
