*Holistic Bioethics* Jude Thaddeus Buyondo, 2024-10-31 In pursuing a holistic bioethics while dialoguing with different sciences appreciation of moral affinities between human and nonhuman entities Dr Buyondo argues for a minimum moral status for nonhuman entities The minimum normative basics of approaches to biomedical ethics are at the very least not distinctive to either human animals or nonhuman animals only The investigation builds further on the African understanding of life where no creation is lifeless In establishing a more inclusive functional bioethics the African approach goes further than biocentrism ecocentrism and holism to ground an inclusive African holistic moral egalitarianism suggesting that all forces and all created things have life We are not emphasizing how every system and creature command equal respect rather everything has life commands respect and moral concern as a minimum imperative within a Black African holistic approach to bioethics However holistic bioethics can neither be Western nor an African invention that people of other cultures only admire from a distance Moreover holistic bioethics doesn't offer the last word on the ethics of nonhuman animals holistic anamnetic solidarity the relational Other and intercultural theological bioethics

**Moral Acquaintances and Moral Decisions** Stephen S. Hanson, 2009-09-18 The potential of modern medicine in a pluralistic world leads to the potential for moral conflict The most prevalent bioethical theories often either overestimate or underestimate the amount of shared moral belief that can be used to address those conflicts This work presents a means for taking seriously the pluralism in the modern world while recognizing the likelihood of moral acquaintance between persons with differing views It criticizes moral theories that overstate the extent of the problem of pluralism as well as those that imply too much agreement between reasonable moral persons yet it locates a means for the resolution of many moral conflicts in moral acquaintanceship Drawing from the work of H Tristram Engelhardt Jr casuists and principle based theorists and Erich Loewy and Kevin W Wildes's initial development of the concept of moral acquaintanceship *Moral Acquaintances and Moral Decisions* is philosophically indepth work with direct

applications for decisionmaking in real medical settings A work in moral theory as well as a source of real world guidance clinically oriented bioethics professionals as well as students of bioethical theory should find the theory of moral acquaintanceship provided here important to their work *Care and Respect in Bioethics* Darlei Dall’Agnol,2016-09-23 This book discusses the philosophical foundations of bioethics with a particular focus on the tensions and potential dilemmas generated by the intuitionist meta ethical commitments of the predominant normative theory namely the four principles approach This view is based on the prima facie norms of respect for autonomy one ought to respect the autonomous choices of subjects of scientific research patients non maleficence one ought to refrain from inflicting harm beneficence one ought to do good and prevent or remove harm and justice one ought to treat people fairly The tensions in applying these basic principles may lead to inaction in scientific experiments involving human subjects or to arbitrary applications of the norms in the art of caring The problem can be made explicit in these terms on the one hand caring without respecting seems blind degenerating into forms of paternalism when for instance the carer imposes her conception of the good life or a particular procedure on the cared for on the other hand respecting without caring amounts to indifference or individualism when for example a person does not look after a vulnerable being properly The initial hypothesis of this book then is that the concept of respectful care can be built up working from an ethico philosophical perspective to be a leading notion capable of guiding our daily actions and bioethical practices
