English in the South Kyria Rebeca Finardi, 2019-06-25. The teaching/learning use of English plays a key role in the geopolitical South. It is important to consider how players in different contexts are impacted by English since globalization and one of its agents, internationalization of higher education, have more positive impacts on the North than in the South, mainly due to a linguistic bias which favors English speaking countries and those which, despite speaking other native languages, adopted English as the language of instruction. So as to see how these forces are interpreted in the geopolitical South, this book offers a glimpse of how English is taught, learned, used, and seen in different contexts in Latin America and in the global South.
