Contemporary Trends In Algebraic Geometry And Algebraic Topology Shiing-shen Chern,Richard Hain,Lei Fu,2002-08-02 The Wei Liang Chow and Kuo Tsai Chen Memorial Conference was proposed and held by Prof S S Chern in Nankai Institute of Mathematics It was devoted to memorializing those two outstanding and original Chinese mathematicians who had made significant contributions to algebraic geometry and algebraic topology respectively It also provided a forum for leading mathematicians to expound and discuss their views on new ideas in these fields as well as trends in 21st Century mathematics About 100 mathematicians participated in the conference including Sir Michael Atiyah Jacob Palis Phillip Griffiths David Eisenbud Philippe Tondeur Yujiro Kawamata Tian Gang etc This invaluable volume contains the selected papers presented at the conference The topics include canonical maps of Gorenstein 3 folds fundamental groups of algebraic curves Chen s interated integrals algebraic fiber spaces and others **Contemporary Trends in Algebraic Geometry and Algebraic Topology** ,2002 Moduli, Motives and Bundles Pedro L. del Ángel R.,Frank Neumann,Alexander H. W. Schmitt,2025-11-30 The present volume features contributions from the 2022 BIRS CMO workshop Moduli Motives and Bundles New Trends in Algebraic Geometry held at the Casa Matem tica Oaxaca CMO in partnership with the Banff International Research Station for Mathematical Innovation and Discovery BIRS The first part presents overview articles on enumerative geometry moduli stacks of coherent sheaves and torsors in complex geometry inspired by related mini course lecture series of the workshop The second part features invited contributions by experts on a diverse range of recent developments in algebraic geometry and its interactions with number theory and mathematical physics offering fresh insights into this active area Students and young researchers will appreciate this text s accessible approach as well as its focus on future research directions and open problems Algebraic Topology: New Trends in Localization and Periodicity Carles Broto,Carles Casacuberta,Guido Mislin,2012-12-06 Central to this collection of papers are new developments in the general theory of localization of spaces This field has undergone tremendous change of late and is yielding new insight into the mysteries of classical homotopy theory The present volume comprises the refereed articles submitted at the Conference on Algebraic Topology held in Sant Feliu de Gu xols Spain in June 1994 Several comprehensive articles on general localization clarify the basic tools and give a report on the state of the art in the subject matter The text is therefore accessible not only to the professional mathematician but also to the advanced student *Algebraic Geometry: Salt Lake City 2015* Tommaso de Fernex,Brendan Hassett,Mircea Mustaţă,Martin Olsson,Mihnea Popa,Richard Thomas,2018-06-01 This is Part 1 of a two volume set Since Oscar Zariski organized a meeting in 1954 there has been a major algebraic geometry meeting every decade Woods Hole 1964 Arcata 1974 Bowdoin 1985 Santa Cruz 1995 and Seattle 2005 The American Mathematical Society has supported these summer institutes for over 50 years Their proceedings volumes have been extremely influential summarizing the state of algebraic geometry at the time and pointing to future developments The most recent Summer

Institute in Algebraic Geometry was held July 2015 at the University of Utah in Salt Lake City sponsored by the AMS with the collaboration of the Clay Mathematics Institute This volume includes surveys growing out of plenary lectures and seminar talks during the meeting Some present a broad overview of their topics while others develop a distinctive perspective on an emerging topic Topics span both complex algebraic geometry and arithmetic questions specifically analytic techniques enumerative geometry moduli theory derived categories birational geometry tropical geometry Diophantine questions geometric representation theory characteristic and adic tools etc The resulting articles will be important references in these areas for years to come **New Trends in Algebraic Geometry** Klaus Hulek,1999-05-13 This book is the outcome of the 1996 Warwick Algebraic Geometry EuroConference containing 17 survey and research articles selected from the most outstanding contemporary research topics in algebraic geometry Several of the articles are expository among these a beautiful short exposition by Paranjape of the new and very simple approach to the resolution of singularities a detailed essay by Ito and Nakamura on the ubiquitous A D E classification centred around simple surface singularities a discussion by Morrison of the new special Lagrangian approach to giving geometric foundations to mirror symmetry and two deep informative surveys by Siebert and Behrend on Gromow Witten invariants treating them from the point of view of algebraic and symplectic geometry The remaining articles cover a wide cross section of the most significant research topics in algebraic geometry This includes Gromow Witten invariants Hodge theory Calabi Yau 3 folds mirror symmetry and classification of varieties **Current Trends in Algebraic Topology** ,1984 *A History of Algebraic and Differential Topology, 1900 - 1960* Jean Dieudonné,2009-09-01 This book is a well informed and detailed analysis of the problems and development of algebraic topology from Poincar and Brouwer to Serre Adams and Thom The author has examined each significant paper along this route and describes the steps and strategy of its proofs and its relation to other work Previously the history of the many technical developments of 20th century mathematics had seemed to present insuperable obstacles to scholarship This book demonstrates in the case of topology how these obstacles can be overcome with enlightening results Within its chosen boundaries the coverage of this book is superb Read it MathSciNet **Current Developments in Algebraic Geometry** Lucia Caporaso,2012-03-19 This volume based on a workshop by the MSRI offers an overview of the state of the art in many areas of algebraic geometry **New Trends in Algebraic Geometry** Klaus Hulek,M Reid,Chris Peters, (Wr,Fabrizio Catanese,Savilian Professor of Geometry N J Hitchin,2014-05-14 Seventeen articles from the most outstanding contemporary topics in algebraic geometry **Iterated Integrals and Cycles on Algebraic Manifolds** Bruno Harris,Kuo-Tsai Chen,2004 This subject has been of great interest both to topologists and to number theorists The first part of this book describes some of the work of Kuo Tsai Chen on iterated integrals and the fundamental group of a manifold The author attempts to make his exposition accessible to beginning graduate students He then proceeds to apply Chen s constructions to algebraic geometry showing how this leads to some results on algebraic cycles and the Abel Jacobi

Lectures on Algebraic Topology Sergeĭ Vladimirovich Matveev,2006 Algebraic topology is the study of the global properties of spaces by means of algebra It is an important branch of modern mathematics with a wide degree of applicability to other fields including geometric topology differential geometry functional analysis differential equations algebraic geometry number theory and theoretical physics This book provides an introduction to the basic concepts and methods of algebraic topology for the beginner It presents elements of both homology theory and homotopy theory and includes various applications The author s intention is to rely on the geometric approach by appealing to the reader s own intuition to help understanding The numerous illustrations in the text also serve this purpose Two features make the text different from the standard literature first special attention is given to providing explicit algorithms for calculating the homology groups and for manipulating the fundamental groups Second the book contains many exercises all of which are supplied with hints or solutions This makes the book suitable for both classroom use and for independent study
