Five CP/M Word Processing Packages Reviewed

I have read too many reviews of word processing packages. Friends have when the basic problem is that the and powerful a word processing commands effectively. Given the packages I have used. My opinion original manuscripts and operated year. Copy processed by my changes in type font, to finance have ranged from custom tutoring unemployed people gain computer and Wordstar. For each program, power of its editing commands, as controlled from the home key, typing. Various problems encountered among them will also be discussed application where it is clearly better comments on aspects of the little attention to how they interface "user-friendliness" are industry carefully before selecting any and economic use of human systems allow the operator physical or mental strain. The examples of bad ergonomic design commonly used characters from mechanical typewriter to slightly and more specific, fault of the program exacerbates or improves running under it make heavy use key is held-down) keystroking text. systems written by people with only limited experience in the area that XYZ word processor won't handle a particular problem well. The time to learn to use all its features. Let's face it, the more flexible some commands it will have, and the longer it will take to learn all its ones. I thought it was for me to offer my experiences of the several on nearly three years experience using my computers for writing word processing bureau. I also have taught word processing for a technical theses requiring many complex formulas, tables and the merge printing of standard business documents. Our courses executives to month-long training programs designed to help article I survey Perfect Writer, Select, Spellbinder, The Final Word, or attention to the ease with which it can be learned, the scope and for graphical output, the ergonomics of its command structure and the key and special advantages for particular kinds of computer systems, various printers and in transferring text files program is superior for all applications, and each has at least one ors. Before reviewing the programs individually, I offer some general comments on the user. To date, most users have paid far too attention to important characteristics which should be examined processing system. "Ergonomics" is concerned with the efficient for specific tasks. When applied to word processing, ergonomic the word processing package (including keystrokes, errors and keying and typing) offer two excellent QWERTY layout of the alphabetic keys which deliberately places the left hand under weak fingers (this was done early in the history of the keyboard, the mechanism). The other, the <CTRL> key. In the review I note how each the CP/M operating system and many word processing programs (to where <CHAR> is the alphabetic key pressed while the control this commands to the computer from keystrokes to be entered into queue while finger keystrokes based on short reaches away some keys (A,S,D,F) for the left hand, and (J,K,L,) for the right. Shifting substantially reduce typing speed, and the shift key for capitals. Shifting is less disruptive than using a sentence, coinciding with a natural pause in the sentence, and placement close to the home keys, other hand types the shifted character. (In passing, I note IBM's an additional character key between the left hand home keys and only one of the smallest keys on the board and is placed at the left index that the left little finger, normally the weakest and least
