Context Of Explanation:

The Context of Explanation M. Bunzl, 2012-12-06 In this book Martin Bunzl considers the prospects for a general and comprehensive account of explanation given the variety of interests that prompt explanations in science Bunzl argues that any successful account of explanation must deal with two very different contexts one static and one dynamic Traditionally theories of explanation have been built for the former of these two contexts That is to say they are designed to show how it is that a finished body of scientific knowledge can be put to explanatory use But finished sciences are few and far between Real explanation also occurs in a dynamical context in which questions are asked and answers are given as theories are in the process of being constructed Here Bunzl argues that attending to explanation produced under these dynamic circumstances undermines prominent features of the theory of explanation produced in the traditional static context

Tomie, 2014-01-14 First published in 1984 The effects of contextual stimuli on the performance of conditioned behaviors have recently become the object of intense theoretical and empirical scrutiny This book presents the work of researchers who have attempted to characterize the role of context in learning through direct experimental manipulation of these stimuli Their work reveals that context has important and systematic effects upon the learning and performance of conditioned responses The roles played by context are diverse and the problems confronted in attempting to evaluate and differentiate contextual functions are formidable These considerations are discussed in the introductory chapter The remaining chapters present an analysis of the role of context in Pavlovian operant and discrimination learning paradigms

of Medicine Lucien Karhausen, 2025-03-24 This book describes the philosophy of medicine as a subset of the philosophy of science It is grounded in an epistemological bottom up account that arises from the clinical situation the epidemiologic and the resulting public health account The volume offers a set of coherent beliefs that are deductively closed which means that any statement which is logically entailed by the theory belongs to the theory Medicine does not originate as usually admitted with the notion of disease inasmuch as concepts of disease malfunction or health are evolved sophisticated and advanced constructs Medical norms i e pathological features are logically and conceptually prior to normal features Following Ludwig Wittgenstein by analogy with the way members of a family resemble each other diseases are often what Ludwig Wittgenstein called family resemblance concepts which manifest a similarity shared by things classified into certain groups in the way members of a family resemble each other each shares characteristics which many but not all the others and there are no necessary or sufficient conditions for belonging in that classification This book analyses the confusions associated with the concept of health and subsequently turns to medical interventions preventive therapeutic and palliative as well as to the caring relationship patients autonomy doctors authority and paternalism Finally the epistemic ethical or ontological limits of medicine are being discussed and the final account leaves us at the end of the scale with the perspective afforded by the patient facing suffering impairment death and tragedy not to mention the physician s predicament which give rise to the principle that undergirds them all i e the value of life
