Brand, Christof H. Heyns, 2005 *Civil Rights, the Constitution, and Congress, 1863-1869* Earl M. Maltz, 1990 Through a close analysis of legislative proceedings and of the precise language used Maltz builds a strong case that Congressional actions on civil rights including statutes such as the Freedman's Bureau Bill the District of Columbia Suffrage Bill and the Civil Rights Act of 1866 as well as the thirteenth fourteenth and fifteenth amendments of the early Reconstruction era generally reflected the ideology and intentions of the more conservative Republicans These moderates advocated limited absolute equality rather than total racial equality and opposed the undue federal regulation of private and state actions A Bill of Rights? Aby, 2007-08-30 The Academic Bill of Rights was introduced in 2003 after two decades of conservative critiques of higher education and its faculty Its goal was to generate legislative initiatives to rein in the tenured radicals who were allegedly dominating higher education and infringing on the academic freedom rights of conservative students At its

root the debate revolves around some core questions who should teach and who has the knowledge and training to hire and evaluate faculty what knowledge should be taught and most fundamentally who should make these decisions Should it be trained faculty who are specialists in their fields and who were hired to teach and advance knowledge Or should it be politicians or outsiders who may be empowered by legislation to interfere in academic decisions The academic freedom of faculty and the independence of higher education depends on the answers to these questions This book is the first to bring together a variety of critiques of the Academic Bill of Rights Furthermore by including some works by David Horowitz and his critics as well as websites and a bibliography reflecting various points of view it gives life to the debate showing some of the give and take of the arguments This collection also presents the background on the historical context of academic freedom showing its fragility and therefore the importance of preserving it Also featured are some core documents such as the AAUP's 1940 Statement of Principles on Academic Freedom and Tenure that are central to the debates Some of the conservative critiques of higher education are identified in the selective annotated bibliography chapter And case studies of how the ABOR was contested in three states where it was introduced as legislation are also included Finally this book attempts to refocus concerns about higher education on the real issue its growing domination by corporate values and interests converting higher education from a public good into an increasingly private commodity
