Contexts, Practices and Challenges: Critical Insights from Continuing Professional Education Maureen Coady, 2016-10-03

Lifelong learning has become essential not only for professionals but also for those they serve. Continuing professional education (CPE) is an umbrella term used to describe the continuum of formal, nonformal, and informal learning opportunities that enable practicing professionals to continue to learn and to maintain professional competence across their careers. This is the focus of this collection. The volume explores, analyzes, and critiques CPE trends and issues across a variety of contexts and highlights new thinking and developments to assist providers and practitioners to re-envision their roles and set new directions in the field of CPE. This collection is inspired by the early seminal works of Cyril Houle, who advocated that educational researchers and providers of CPE should listen to the experience of professionals as a basis for supporting their professional learning. This is the 151st volume of the Jossey-Bass series *New Directions for Adult and Continuing Education*. Noted for its depth of coverage, it explores issues of common interest to instructors, administrators, counselors, and policymakers in a broad range of education settings, such as colleges and universities, extension programs, businesses, libraries, and museums.

Facilitating Learning in Online Environments Steven R. Aragon, 2010-04-22

This volume presents models, methods, and strategies that facilitate and promote learning within online environments. Arguing that success in online environments is dependent on the role of autonomy in order to create sustained and enduring learners, the introductory chapter presents current research and identifies ways through which autonomous learning is established within the learning environment. Contributors demonstrate how quality online programs are made up of a blend of technology, pedagogy, organization, strategy, and vision. They explore the concept of online social presence as a significant factor in improving instructional effectiveness and contributing to a feeling of community among learners and offer strategies for instructors facing the new challenges and opportunities of the online educational experience. Two chapters examine master's level online programming by exploring a model through which the design template for one such program was built and presenting the actual experiences of students who completed master's degrees online. Editor Steven R. Aragon joins his colleagues to make the case that instructional designers need ways to support quality teaching and learning within online environments that take into account the variability in student learning styles, provide external motivation for the isolated students, and build community, collaboration, and communications among learners. Finally, contributors from the field analyze the impact that online technology is having on training and development initiatives of business and industry and demonstrate how current trends have cultivated an environment open to online learning. This is the 100th issue of the Jossey-Bass series *New Directions for Adult and Continuing Education*.

Adult and Continuing Education Today, 1983 Evaluation for Continuing

Education Alan B. Knox, 2002-10-02 Evaluation for Continuing Education provides the useful and practical tools necessary to ensure a successful program evaluation. The book presents systematic guidelines aimed at enhancing understanding of evaluation concepts and procedures and offers manageable ways to selectively include evaluation activities as an integral part of program planning, implementation, and justification. Author Alan Knox reveals that the key to successful evaluations that improve education programs for adults is a basic rationale for why and how. He helps readers select and develop their own rationale throughout the course of the book while suggesting fundamental evaluation concepts and procedures. He shows how to distinguish some program aspect upon which a specific evaluation project will focus, including needs assessment, goals, and policies, staffing, assessment materials, development, and more, and summarizes examples of evaluation reports that reflect the various types of providers and scales on which evaluations are conducted. Knox offers a particularly wide variety of these examples, enabling readers to reflect on implications for their own evaluations and fashion unique guidelines and procedures that fit their own situations.
