Contract Strategies for Major Projects Edward W. Merrow,2022-11-24 Major Projects are Delayed by Months or Years and Cost Millions More Than Budgeted Because of Common Mistakes Made at the Contracting Stage Organizations that invest huge amounts of capital in major building industrial projects almost never do the engineering and building themselves They hire engineering and construction contractors to do it for them Unfortunately selecting contractors and negotiating the terms of a major project is one of the most difficult aspects of project management and organizations waste billions of dollars and bake in months or years of delay by doing it wrong Contracting is also the area of project management that is most prone to firmly held opinions unencumbered by any facts We intend to remedy that situation with this book Drawing on a proprietary detailed database of over 1100 major projects the world s leading industrial engineering project consultant Ed Merrow explains Key Principles of Contracting for Major Projects Owners are from Mars contractors are from Venus All the biggest risks in contracting belong to the owner Contracting games will normally be won by contractors not owners Most risk transfer from owners to contractors is an illusion Contractors do good projects well and bad projects poorly Contractors may have shareholders but they are not your shareholders Mixing different contract types with

different contractors on the same project is unwise Economize on the need for trust trust only when being trustworthy has value Merrow also explains Which contract incentives work and which don t and WHY Which of over a dozen contracting strategies work best and which ones hardly ever work and WHY The strategic advice in this book is designed for owners and contractor project managers team members and supply chain executives and other business leaders involved in major projects It s also an indispensable resource for engineers leaders of industrial firms bankers and academics studying the messy realities of the construction and engineering industries

**International Contracting: Contract**

**Management In Complex Construction Projects** Arjan Van Weele, John Van Der Puil, 2013-10-25 This book about international contracting and contract management is written from the angle of the contractor and discussed from an international perspective. It comments on real life cases taken from various kinds of projects: infrastructural works, roads, bridges, tunnels, rail roads, wind and sunfarms, oil and gas installations such as platforms, pipe lines, power generating works, and large buildings. The book is structured around the contracting cycle. Chapters include dealing with the role of the contractor in international contracting, the tender process, landing and negotiating the contract, types of contract problems that may occur during project execution, project delivery and handling guarantee claims. Written primarily for business practitioners operating in the international contracting industry, the title assumes that the reader will have a basic understanding and knowledge of theories related to project management, construction engineering, business law, and economics. Though not an academic book due to its unique blend of practitioners' insight and academic theory, it can be taught on Masters courses. As most engineers are going to deal with contracts, this book is specifically recommended for engineering programs at both graduate and postgraduate levels. Lawyers will find the book useful in helping them to understand the business context in which their customers and/or colleagues work.

**Interpreting Construction Contracts** H. Randolph Thomas, Ralph D. Ellis (Ph.D.), 2007 Thomas and Ellis discuss the most troublesome contract clauses and present rules to construe them so as to avoid disputes that must be resolved in court.
