Contradictions In Collaboration New Thinking On School University Partnerships:

Contradictions in Collaboration Marilyn Johnston,1997 **Learning in School-University Partnership** Amy B.M. Tsui,Gwyn Edwards,Fran Lopez-Real,Tammy Kwan,Doris Law,Philip Stimpson,Rosina Tang,Albert Wong,2008-10-20 This volume looks at school university partnerships from sociocultural perspectives of learning that view participation in social practice as fundamental to the process of learning Its two major themes school university partnership and sociocultural and social theories of learning have both been treated extensively in the literature It is the bringing together of these two themes that makes this book unique In this examination of an evolving model of school university partnership the Unified Professional Development Project in Hong Kong the authors analyze the learning that takes place as the participants student teachers mentor teachers and university supervisors mutually engage in the enterprise of improving teaching and learning in schools developing shared practices and creating new communities of practice Although it describes one specific context the book is not just about this locale Rather the Unified Professional Development Project is used as a context for theorizing more generally a social theory of learning for school university partnerships that is relevant to any other similar context This book will interest teacher educators researchers in teacher education and teacher development policy makers and school practitioners who are involved in school university partnerships Collaborative Reform and Other Improbable Dreams Marilyn Johnston-Parsons,Patti Brosnan,Tim Dove,Don Cramer,2000-02-17 Examines Professional Development Schools or teaching schools and the myriad complex issues from policy to personnel that surround their operation **Models of Science Teacher Preparation** D.R. Lavoie,W.M. Roth,2005-12-29 This unique edited book is a must for science educators who desire to improve upon traditional methods for science teaching and learning It provides background theoretical research based frameworks guidelines and concrete examples for the implementation and assessment of innovative models of science learning teaching and professional preparation **Dialogue and Difference in a Teacher Education Program** Marilyn Johnston-Parsons,2012-03-01 This book is a 10 year study of an experimental teacher education program for urban schools It highlights effective practices through collaboration between a university and teachers The study shows high retention rates and argues for the cost effectiveness of quality teacher preparation programs **Promotion of Social Awareness** Robert L. Selman,2003-05-15 Education specialists have written volumes on the best ways to help children learn to read and write but who is helping them navigate the potentially treacherous waters of social interactions While in school to study children are also preoccupied with understanding the rules governing social relationships Issues of trust and loyalty rivalry and conflict belonging and exclusion affect all school aged children but very few lesson plans include social development skills The Promotion of Social Awareness summarizes thirty years of research on the social development of children in elementary and middle school and shows how this work has led to a series of programs that promote the social competence of children and adolescents Rich with lessons drawn from real life the book includes an in depth account of the

author's partnership with an innovative program designed to help educators promote a sound ethic of social relationships among children a case study of a teacher particularly gifted at promoting such relationships and the tale of how the author's theoretical framework fared cross culturally when exported to Iceland The Promotion of Social Awareness documents Robert Selman's efforts both as a practitioner trying to help young people develop their interpersonal skills and as a researcher attempting to understand the factors that promote or hinder social development Selman believes that getting along with others involves concrete and measurable social skills and actions that can be taught The book underlines how the science of social development has given rise to initiatives and programs that can be used in educational settings to help children get along with each other and may in the long run help prevent violence drug abuse and prejudice Unique in its marriage of theory and practice The Promotion of Social Awareness will appeal to a wide readership including developmental psychologists educators and parents
