Professor C.R. Rao's Contributions to Econometrics Krishna T. Kumar, Hrishikesh D. Vinod, Prof. Suresh Deman, 2011 Calyampudi Radhakrishna Rao Rao for brevity henceforth just celebrated his 90th birthday He received numerous honors including 1972 fellow of Econometric Society and the 2002 US Medal of Science the citation of which recognized his contributions to economics He co founded with Mahalanobis the Indian Econometric Society and laid probabilistic foundations for linear structural economic relations in his *Econometrica* article in 1947 solving a problem suggested by Frisch This paper reviews Rao's contributions to economic science including i specification of linear structural economic relations ii identification of the model iii efficient estimation of the model and iv testing of hypotheses about the economic structure Our review of his work also indicates a rich potential of his contributions advancing economic science as some of his contributions have not been fully exploited by economists

Contributions to Econometric Theory and Application R.A.L. Carter, J. Dutta, A. Ullah, 2012-12-06 The purpose of this volume is to honour a pioneer in the field of econometrics A L Nagar on the occasion of his sixtieth birthday Fourteen econometricians from six countries on four continents have contributed to this project One of us was his teacher some of us were his students many of us were his colleagues all of us are his friends Our volume opens with a paper by L R Klein which discusses the meaning and role of exogenous variables in structural and vector autoregressive econometric models Several examples from recent macroeconomic history are presented and the notion of Granger causality is discussed This is followed by two papers dealing with an issue of considerable relevance to developing countries such as India the measurement of the inequality in the distribution of income The paper by C T West and H Theil

deals with the problem of measuring inequality of all components of total income within a region rather than just labour income. It applies its results to the regions of the United States. The second paper in this group by N Kakwani derives the large sample distributions of several popular inequality measures thus providing a method for drawing large sample inferences about the differences in inequality between regions. The techniques are applied to the regions of Cote d'Ivoire. The next group of papers is devoted to econometric theory in the context of the dynamic simultaneous linear equations model. The first by P J

A Retrospective on J. Denis Sargan and His Contributions to Econometrics Neil R. Ericsson, Esfandiar Maasoumi, Grayham E. Mizon, 2001. This retrospective provides a biographical history of Denis Sargan's career and reviews his contributions to econometrics emphasizing the breadth of his work in both theoretical and applied econometrics. We include a complete bibliography for Denis and a list of PhD theses that he supervised. Students were a substantive facet of his professional life. Finally two of Denis's previously unpublished manuscripts on model building now appear in print.
