Optimal Control of Wind Energy Systems Iulian Munteanu,Antoneta Iuliana Bratcu,Nicolaos-Antonio Cutululis,Emil Ceanga,2008-02-05 Optimal Control of Wind Energy Systems is a thorough review of the main control issues in wind power generation covering many industrial application problems A series of control techniques are analyzed and compared starting with the classical ones like PI control and gain scheduling techniques and continuing with some modern ones sliding mode techniques feedback linearization control and robust control Discussion is directed at identifying the benefits of a global dynamic optimization approach to wind power systems The main results are presented and illustrated by case studies and MATLAB Simulink simulation The corresponding programmes and block diagrams can be downloaded from the book s page at springer com For some of the case studies presented real time simulation results are available Control engineers researchers and graduate students interested in learning and applying systematic optimization procedures to wind power systems will find this a most useful guide to the field

Mixed Integer Nonlinear Programming Jon Lee,Sven Leyffer,2011-12-02 Many engineering operations and scientific applications include a mixture of discrete and continuous decision variables and nonlinear relationships involving the decision variables that have a pronounced effect on the set of feasible and optimal solutions Mixed integer nonlinear programming MINLP problems combine the numerical difficulties of handling nonlinear functions with the challenge of optimizing in the context of nonconvex functions and discrete variables MINLP is one of the most flexible modeling paradigms available for optimization but because its scope is so broad in the most general cases it is hopelessly intractable Nonetheless an expanding body of researchers and practitioners including chemical engineers operations researchers industrial engineers mechanical engineers economists statisticians computer scientists operations managers and mathematical programmers are interested in solving large scale MINLP instances
