Control And Treatment Of Combined Sewer Overflows:

The Control and Treatment of Combined Sewer Overflows Peter E. Moffa, 1997-08-29 Control and Treatment of Combined Sewer Overflows Second Edition Edited by Peter E Moffa In cities where storm and sanitary sewers are operated as one system storm runoff overflows remain the most common potential source of untreated human waste in the water supply and the single biggest obstacle to achieving the swimmability goals of the 1972 Clean Water Act Amendments Communities upgrading old systems in order to provide safe EPA compliant water to their growing populations face both logistical and financial challenges Yet in the last decade significant advances in combined sewage overflow CSO abatement have been realized The National CSO Control Strategy was published in 1989 with the final CSO policy approved in 1994 The EPA has intensified research and development receiving water impacts have been quantified more cost effective plans prototypes and facilities have been tested and implemented and the water supplies in over a dozen U S cities are showing dramatically diminished CSO pollution levels This revised edition of Control and Treatment of Combined Sewer Overflows takes into account recent advances in research planning and practice to be the single most authoritative and up to date resource on CSO abatement Written by expert CSO consultant Peter Moffa and a contributing team of top engineers the book provides both the mathematical and analytical tools necessary for modeling current sewer systems and developing workable CSO abatement strategies Control and Treatment of Combined Sewer Overflows Second Edition Features A condensed overview of federal CSO policy watershed Guidelines for minimum control long term control planning screening and ranking project funding CSO monitoring and modeling and performance measurement Fully updated discussions of mathematical models for combined sewer systems A wide range of practical control and treatment technology systems many developed since 1989 and Recent Case Studies a complete section on cost effect analysis showing how a number of U S cities enact effective storage abatement and disinfection plans This edition features new case studies on Rouge River Charlotte NC and Decatur IL plus updated reports from Onondaga County NY and Washington DC Control and Treatment of Combined Sewer Overflows Second Edition is an essential reference for wastewater and sanitary engineers as well as city planners and administrators responsible for wastewater treatment It is also the ideal textbook for advanced undergraduate and graduate students in wastewater and environmental engineering

Management of Combined Sewer Overflows Richard Field, Daniel Sullivan, Anthony N. Tafuri, 2003-11-24 There are approximately 10 000 combined sewer overflow CSO locations in the United States During peak storm events they can release about 1 2 trillion gallons of waste and up to 95% of a municipality s raw sewage into surface waters Although many cities have initiated programs the CSO problem remains largely unsolved and continues to be a major

Control and Treatment of Combined-sewer Overflow Peter E. Moffa, 1990 Very Good No Highlights or Markup all pages are intact

Countermeasures for Pollution from Overflows Richard Field, John A. Lager, 1974 Control and or treatment of stormwater discharges and combined sewage overflows from urban areas are

problems of increasing importance in the field of water quality management Over the past decade much research effort has been expended and a large amount of data has been generated primarily through the actions and support of the U S Environmental Protection Agency s EPA Storm and Combined Sewer Research and Development Program Presented in this text are selected results of a comprehensive investigation and assessment of promising completed and ongoing projects representative of the state of the art in abatement theory and technology a look at recent legislation and the identification of program needs and emphasis Combined sewer overflows are major sources of water pollution problems but even discharges of stormwater alone can seriously affect water quality Current approaches involve control of overflows treatment and combinations of the two Control may involve maximizing treatment with existing facilities control of infiltration and extraneous inflows surface sanitation and management as well as flow regulation and storage A number of treatment methods have been evaluated including high rate screening and microstraining ultra high rate filtration dissolved air flotation physical chemical treatment and modified biological processes A swirl flow regulator solids separator of anular shape construction with no moving parts has been developed High rate disinfection methods including new disinfectants have been applied Promising approaches involve integrated use of controls and treatment The most disappointing have generally lacked flexibility in their operation and design Mathematical models have been developed and successfully applied at multiple levels of sophistication and complexity
