Contemporary Psychotherapies:

Contemporary Psychotherapies for a Diverse World Jon Frew, Michael D. Spiegler, 2012-05-04 This unique text is the first to provide an introduction to the theory and practice of the major theories of psychotherapy and at the same time illustrate how these approaches are dealing with the ever increasing diversity of today's clients. Frew and Spiegler have assembled the leading contemporary authorities on each theory to offer an insider's perspective that includes exposure to the style and language used by adherents of the approach which is not available in any other text. The history of each approach and the latest cutting edge theory and practice are integrated with an emphasis on an awareness of the needs of diverse non majority clients creating a comprehensive practical and invaluable text for any counseling theories course. The major psychotherapeutic approaches are presented in roughly the chronological order in which they were developed and each chapter follows the same basic format to ensure consistency throughout the text. Along with traditional theories there are chapters on reality therapy, feminist therapy, and narrative therapy, and the chapter on ethics includes multicultural and feminist perspectives. Each chapter includes the origin and evolution of the theory, theoretical foundations, and how the theory is manifested in practice, an evaluation of the evidence for the theory's success, limitations, blind spots, and challenges. The Author's Journey in which authors describe what led them to adopt their approach and how their own practice has evolved over time, multicultural competencies and their importance in the context of the theory. Resources are available online for instructors to supplement the material in the text and include a test bank and PowerPoint lecture slides.

Contemporary Psychotherapies Gary S. Belkin, 1987 [Contemporary Psychotherapies](#) Morris Isaac Stein, 1961 **Psychiatry as Medicine** A. Fried, J. Agassi, 2012-12-06
PREFACE This volume is a sequel to yet independent of our *Paranoia: A Study in Diagnosis* (Reidel, Dordrecht and Boston, 1976). Whereas our first book centered on diagnosis, this centers on treatment. In our first volume, all discussions of nosology, theory of illness, and of treatment were ancillary to our discussion of diagnosis; similarly, all discussion of this volume dealing with nosology is very little on diagnosis; here is ancillary to our discussion of psychotherapy. It is still our profoundest conviction that to speak of treatment without diagnosis is meaningless if not irresponsible since otherwise one does not know what one is talking about. Hence our present study, though it centers on theories of treatment, links psychotherapy with psychopathology. It is the rationale of psychotherapy which is of importance and the rationale dwells in this link. We wish our present study to be self-contained and understood by readers who are not familiar with our first book or with any specific literature. Our discussion of medicine in general, meaning the rationale of therapy in general, helps the uninitiated reader as well as the initiated; we hope it certainly has helped us. We did not see how else can we study a branch of medicine; we felt the need for some idea of how medicine is supposed to work.
