Contemporary Trends in Landscape Architecture in the Pacific Coast States Joseph S. Elfner,1949 **Modern Landscape Architecture** Marc Treib,1994-07-25 Twenty two essays that provide a forum for assessing the tenets accomplishments and limits of modernism in landscape architecture and for formulating ideas about possible directions for the future of the discipline These twenty two essays provide a rich forum for assessing the tenets accomplishments and limits of modernism in landscape architecture and for formulating ideas about possible directions for the future of the discipline During the 1930s Garrett Eckbo Dan Kiley and James Rose began to integrate modernist architectural ideas into their work and to design a landscape more in accord with the life and sensibilities of their time Together with Thomas Church whose gardens provided the setting for California living they laid the foundations for a modern American landscape design This first critical assessment of modern landscape architecture brings together seminal articles from the 1930s and 1940s by Eckbo Kiley Rose Fletcher Steele and Christopher Tunnard and includes contributions by contemporary writers and designers such as Peirce Lewis Catherine Howett John Dixon Hunt Peter Walker and Martha Schwartz who examine the historical and cultural framework within which modern landscape designers have worked There are also essays by Lance Necker Reuben Rainey Gregg Bleam Michael Laurie and Marc Treib that discuss the designs and legacy of the Americans Tunnard Eckbo Church Kiley and Robert Irwin Dorothy e Imbert takes up Pierre Emile Legrain and French modernist gardens of the 1920s and Thorbj rn Andersson reviews experiments with stylized naturalism developed by Erik Glemme and others in the Stockholm park system *Contemporary Trends and Future Possibilities in Landscape Design* Malcolm H. Women in Landscape Architecture Louise A. Mazingo,Linda Jewell,2011-12-22 While many fields struggle to specify feminine contributions the work of women has always played a fundamental role in American landscape architecture Women claim responsibility for many landscape types now taken for granted including community gardens playgrounds and streetscapes This collection of essays by leaders in the discipline addresses the ways that gender has influenced the history design practice and perception of landscapes It highlights women s relation to landscape architecture presents the professional efforts of women in the landscape realm examines both the perception and experience of landscapes by women and speculates on ways to re imagine gender and the landscape **Bimonthly Index to Current Publications of Professional Interest** ,1930 **The Modern Garden** Pierluigi Serraino,2024-10-01 Visionary landscape architecture and garden design at mid century in North America is captured by the greats of the era including Julius Shulman and Ezra Stoller

in many previously unpublished photographs The treasures of mid century American architecture have long been celebrated Less appreciated has been the landscape design that provides the framing for these masterworks But more than frame landscape architecture is an art worthy of the spotlight particularly at mid century when the notion that gardens are outdoor spaces for people to live in was championed and brought to the fore now gardens and landscapes are not just external attributes to the house but a continuation of it and its living spaces in a relationship of symbiosis with its pools and terraces its winding lawns and its partly enclosed room like spaces flanked by brick or stone or plantings in a range of colors and forms Approximately seventy five mostly residential projects are thoroughly documented and recounted Landscape architects whose work is featured include Thomas Church Lawrence Halprin and Garrett Eckbo among others Highlights include the dramatic surrounds of Richard Neutra s Perkins House in its Pasadena hillside setting and Frank Lloyd Wright s Marin County Civic Center where environment and building come together in an extraordinary modernist vision of the future made real This book is both a wishful gesture toward a realignment of building with nature and a must have for anyone with a visceral appreciation for a designed environment understood as an integrated whole Ultimately the book underlines the fundamental importance of gardens and landscape design intended in the widest possible sense for the quality of living of all individuals
