Equality and Public Policy Paul Chaney, 2011-01-31 Equality of opportunity is a contested concept It evokes strong emotions from proponents and opponents alike Enduring issues of inequality and discrimination mean that it remains at the forefront of political priorities in the twenty first century Traditional analyses tend to focus on

developments at the level of the unitary state or European Union In contrast this book underlines the salience of multi level governance and offers the first detailed comparative analysis of contemporary efforts to promote equality of opportunity in the wake of constitutional reform in the UK It presents a summary of social theory on equalities in relation to gender and a full range of social groups and identities such as disability ethnicity sexual orientation and age It outlines the contemporary evidence base relating to patterns and processes of inequality in the devolved nations A governance perspective is also advanced one that details how constitutional law establishing the devolved legislatures contains equality clauses that enable and empower government to promote equality in public policy and law Analysis reveals the development of distinctive regulatory structures and equalities policy lobbies in each territory Overall this volume charts the development of divergent legal rights and public policy on the promotion of equality in the wake of constitutional reform in the UK Notwithstanding ongoing challenges it is argued that the move to quasi federalism is significant for it marks a shift from the predominant centralised administration of social policy witnessed throughout the twentieth century to divergent approaches designed to address contrasting socio economic patterns and processes in Wales Scotland and Northern Ireland

Evaluation for the Real World Palfrey, Colin, Thomas, Paul, 2012-06-13 Evaluation research findings should be a key element of the policy making process yet in reality they are often disregarded This valuable book examines the development of evaluation and its impact on public policy by analysing evaluation frameworks and criteria which are available when evaluating public policies and services It further examines the nature of evidence and its use and non use by decision makers and assesses the work of influential academics in the USA and UK in the context of evaluation and policy making The book emphasises the real world of decision makers in the public sector and recognises how political demands and economic pressures can affect the decisions of those who commission evaluation research while providing recommendations for policymakers on adopting a different approach to evaluation This is essential reading for under graduate and post graduate students of policy analysis and public sector management and those who are involved in the planning and evaluation of public policies and services
