

Situational context VS. linguistic context

1. **Situational context** refers to the particular **spatiotemporal situation** in which an utterance occurs, the main components of which include, apart from the place and time of the utterance, the speaker and the hearer, the actions they are performing at the time, the various objects and events existing in the situation.

2. **Linguistic context**, sometimes known as context, is concerned with the probability of a word's **co-occurrence or collocation** with another word, which forms part of the 'meaning' of the word, and also concerned with the part of text that **precedes and follows** a particular utterance.

Contexts Of Language:

Language and Situation Michael Gregory, Susanne Carroll, 2018-09-14 Originally published in 1978 This book provides and explains a framework for understanding and describing variations of style of language in relation to the social context in which it is used Constant features of language users such as their temporal geographical and social origins their range of intelligibility and their individualities are related to concepts of dialects but dialects are not the only kind of language variety There are features of language situations that yield others the medium used the roles of the users and their relationships as well as recurring situations and cultural habits all relate to the style employed Variety in language can be seen in terms of the major functions of language as content as inter action and as texture Studying variety in language from sociological and linguistic aspects this book is also interesting for psycholinguistics and literary study

Context in Language Learning and Language Understanding Kirsten Malmkj'r, John Williams, 1998-10-08 The papers in this volume represent the views of a range of experts in a variety of language related disciplines on the role which context plays in language learning and language understanding The authors provide various theoretical constructs which help impose order on the apparent chaos of contextual factors which may have an influence on the production and comprehension of speech events They focus on a variety of types of context including the context established by different speech communities interpersonal contexts the classroom context and the context provided by the linguistic code itself The papers illustrate how the treatment of context varies across the disciplines of linguistics historical stylistics applied linguistics and psycholinguistics Each paper is prefaced by an editorial introduction to help the reader trace out common themes and points of conflict

Context Language Hugo Raines, AI, 2025-05-05 Context Language explores the critical role of context in shaping communication It delves into how the time place and culture surrounding language profoundly influence its meaning and impact The book highlights intriguing facts such as how linguistic relativity demonstrates that different cultures languages shape their thought processes and how framing can alter audience perception through strategic word choices Understanding context is crucial to ensure effective communication and avoid misunderstandings The book approaches these complex ideas by drawing on historical context from sociolinguistics and communication theory It begins by establishing a theoretical foundation then develops its argument through analyzing the impact of historical events on language examining regional dialects and language varieties and exploring the influence of technology and globalization This approach provides readers with a robust understanding of how historical context cultural context and even global communication influence language The book culminates with strategies for navigating diverse communication contexts emphasizing the importance of cultural awareness By examining historical linguistics and communication theory Context Language offers a unique perspective on persuasive communication and cultural awareness It

demonstrates how an understanding of context is essential for navigating today's diverse communication landscape **The Context of Language Teaching** Jack C. Richards, 1985-04-26 This is an important collection of papers by a distinguished personality in the field. Topics covered include second language acquisition, syllabus design, methodology and methods, listening, speaking, vocabulary and grammar. Issues in applied linguistics are summarised and presented with clarity and their practical implications explored, thus making the vital connection between theory and practice in language teaching. Language teachers and students of applied linguistics will find this collection contains a wide range of recent work in linguistics presented in a lucid and highly accessible form. *Language, Context, and Text* Michael Alexander Kirkwood Halliday, Ruqaiya Hasan, 1991 This book reflects the view that the understanding of language lies in the study of texts and that the context is vital to the development and interpretation of the text itself. The approach to language is a functional one in which the different registers of a language are explained through contexts of situation. The analysis of texts reveals how each text is unique while the way the text is organized relates closely to the place and value that it has in its social and cultural environment. **Rethinking Context** Alessandro Duranti, 1992-05-21 The last decade has seen a fundamental rethinking of the concept of context. Rather than functioning solely as a constraint on linguistic performance, context is now also analysed as a product of language use. In this new perspective, language and context are seen as interactively achieved phenomena rather than predefined sets of forms and contents. The essays in this collection, written by many of the leading figures in the social sciences, critically reexamine the concept of context from a variety of different angles and propose new ways of thinking about it with reference to specific human activities such as face-to-face interaction, radio talk, medical diagnosis, political encounters and socialisation practices. Each essay is prefaced by an introduction by the editors which provides relevant theoretical and methodological background and demonstrates its relation to other essays in the volume. The editors' general introduction provides a lucid overview of the issues currently debated. *Rethinking Context* will be required reading for everyone working within the fields of linguistic anthropology, sociolinguistics, discourse analysis, pragmatics, conversation analysis and the sociology of language. *Language and Context* Helen Leckie-Tarry, 1995-06-01 *Language and Context* breaks new ground in our understanding of the relationship between register, genre and context. Leckie-Tarry argues convincingly and engagingly for a functional theory of language which specifies register in terms of contextual and linguistic features and which suggests a discursive relationship between the two. Moving beyond the limits of much of today's theory, this accessible volume develops a theoretical understanding of the relationship between text, context, language function and linguistic form. Helen Leckie-Tarry, a specialist in the area of register and applied linguistics, died in 1991, aged 49. Although she had finished a large part of this work, her notes and draft chapters have been extensively edited by Professor David Birch. David Birch is currently Professor of Communication and Media Studies at Central Queensland University, Australia, and previously taught at Murdoch University, Western Australia, and the National University of Singapore. **The social and**

This volume suggests a novel treatment of context in the analysis of everyday interaction On a theoretical level it advocates a switch of focus from context as a preestablished monolithic category which constricts co participants verbal and nonverbal behaviour to an active notion of contextualization in order to make oneself understood participants have to establish and maintain those shared contextual frames which in turn are relevant to the local interpretation of their verbal and nonverbal activities On an empirical level the volume contains exemplary analyses that show how participants employ contextualization cues of prosodic rhythm intonation tempo etc or nonverbal gaze gesture etc nature in order to achieve context The volume is also an appraisal of the theory of contextualization developed by John Gumperz In their contributions researchers from various schools of research such as conversation analysis micro ethnography phonetics phonology and metapragmatics relate their work to this theory **A Macro-sociolinguistic Analysis of Language Vitality** Grant D.
