**Art, Research, Philosophy** Clive Cazeaux, 2017-04-11 Art Research Philosophy explores the emergent field of artistic research art produced as a contribution to knowledge As a new subject it raises several questions What is art as research Don t the requirements of research amount to an imposition on the artistic process that dilutes the power of art How can something subjective become objective What is the relationship between art and writing Doesn t description always miss the particularity of the artwork This is the first book length study to show how ideas in philosophy can be applied to artistic research to answer its questions and to make proposals for its future Clive Cazeaux argues that artistic research is an exciting development in the historical debate between aesthetics and the theory of knowledge The book draws upon Kant phenomenology and critical theory to show how the immediacies of art and experience are enmeshed in the structures that create knowledge The power of art to act on these structures is illustrated through a series of studies that look closely at a number of contemporary artworks This book will be ideal for postgraduate students and scholars of the visual and creative arts aesthetics and art theory The Open Access version of this book available at [www.taylorandfrancis.com](http://www.taylorandfrancis.com) has been made available under a Creative Commons Attribution NonCommercial No Derivatives 4.0 license <https://www.taylorfrancis.com/books/9781315764610>

Bleiker, 2009-08-28 This book presents one of the first systematic assessments of aesthetic insights into world politics It examines the nature of aesthetic approaches and outlines how they differ from traditional analysis of politics The book explores the potential and limits of aesthetics through a series of case studies on language and poetics *Color, Facture, Art and Design* Iona Singh, 2012-10-26 Color Facture Art and Design seeks to understand art and design from the aspect of materials construction and the senses It contends that this element is omitted from art and design theory as a product of the division of labour and alienation as it operates within the realms of theory and art history It investigates the beauty of art

based on the somatic magic of the physical body and its relationship to nature arguing that the sensual affect of expert artistic combinations of art materials in some paintings exploits a bridge between the intricacies of human sentience and the external world Art is thus more accurately located next to the sciences of language mathematics physiology and psychoanalysis As the pure mathematics of the discipline this materialist definition of fine art develops guidelines for architecture design cultural studies and ultimately social change
