Contribution of Information and Communication Technologies to Growth Christine Zhen-Wei Qiang, Alexander Pitt, Seth Ayers, 2004 This paper considers key factors in the contribution of information and communication technology ICT developments to economic growth Issues discussed include methodologies used to evaluate how ICT influences productivity growth a critical assessment of its contribution to growth in various countries factors that increase and obstruct ICT expansion the challenges developing countries face in realising the growth potential of ICTs and policy recommendations aimed at surmounting these challenges Contribution of Information and Communication Technologies to Growth Christine Zhen-Wei Qiang, Alexander Pitt, Seth Ayers, 2004 Annotation Contribution of Information and Communication Technologies to Growth is part of the World Bank Working Paper series These papers are published to communicate the results of the Bank s ongoing research and to stimulate public discussion The worldwide development of information and communication technology ICT has accelerated dramatically over the past decade Technological advances and increased competition have led to falling prices for ICT goods and services which has provided a strong incentive to replace other forms of capital and labor with information technology equipment Increased ICT production and use has the potential to create job opportunities transfer skills and increase efficiency and transparency in politics and business and therefore contribute to economic growth This paper focuses on the linkage between ICT and output growth It summarizes findings in the literature on the contribution of information and communication technology to economic growth arising from capital deepening and increases in total factor productivity The paper contains The methodologies used to evaluate the different ways ICT influences productivity growth A critical assessment of the magnitude of ICT s contribution to growth in various countries A summary of the key factors that increase and obstruct ICT expansion and An outline of the challenges developing countries face in maximizing ICT s contribution to growth and policy recommendations aimed at surmounting these challenges The Contribution of Information and Communication Technology to Output Growth Paul Schreyer, 2000 *The Contribution of Information and Communication Technologies to Growth in Europe and the US* Werner Roeger, 2001 Recoge Introduction Part I Empirical Evidence on ICT in Europe and the US Part II Macroeconomic Implications for Growth and Employment Appendix *Impact of ICT in the developing countries on the economic growth* Stefan Detschew, 2008-05-05 Diploma Thesis from the year 2007 in the subject Business economics Economic Policy grade 1.5 Technical University of Ilmenau Institut für Wirtschaftswissenschaften language English abstract This paper discusses the relevance of Information and Communication Technologies ICT for economic growth in developing economies By reviewing the contributions from the neoclassical and endogenous growth theory and empiric evidences for the link between ICT and economic growth the paper clearly concludes that ICTs facilitate economic growth principally by providing incentives for capital deepening and increasing productivity through rapid technological progress However the impact on growth is more extensive from the long term ICT use and

networking that though requires appropriate ICT investment and complementary efforts in order that spillovers and productivity improvements are triggered and exploited totally This paper derives the key determinants and interacting factors that in the corresponding correct synergic combination promote ICT s impact on growth generating processes For a variety of reasons the states of these factors in developing countries provide a less ICT favourable environment for taking advantage from ICTs These economies exhibit a lower stock of human capacities and per capita capital to trigger the productivity benefits from the ICT use Therefore the level of effort is higher than in the developed world to receive return on ICT investment However when they achieve to attract capital and knowledge by encouraging ICT investment and technology transfer supported by international openness maintained financial and institutional systems deregulation of markets and higher competition they have the chance to benefit from adopting best practices and technologies from the industrialized world with complementary efforts in the reorganisation of business organisations and processes and enhanced human ICT skills and management
