Control of Distributed Singular Systems Jacques-Louis Lions,1985      **Control of Distributed Singular System** L. Lions,1987-12-29 This book studies the control of instabilities explosion phenomena and multiple solutions and bifurcation phenomena of singular distributed systems These concepts are motivated by applications such as the control of enzymatic reactions control of transmission of electrical energy and control of the formation of plasmas Also provides discussion of open problems Chapters are relatively self contained making for easy reference      Control of Distributed Singular Systems Jacques-Louis Lions,1985 the purpose of this book is to describe and analyse and to some extent generalise the principal results scattered in the literature concerning perturbation methods in optimal control for systems that are governed by deterministic or stochastic differential equations Preface      Optimal Control Problems for Partial Differential Equations on Reticulated Domains Peter I. Kogut,Günter R. Leugering,2011-09-09 In the development of optimal control the complexity of the systems to which it is applied has increased significantly becoming an issue in scientific computing In order to carry out model reduction on these systems the authors of this work have developed a method based on asymptotic analysis Moving from abstract explanations to examples and applications with a focus on structural network problems they aim at combining techniques of homogenization and approximation Optimal Control Problems for Partial Differential Equations on Reticulated Domains is an excellent reference tool for graduate students researchers and practitioners in mathematics and areas of engineering involving reticulated domains      **Distributed Sensing and Intelligent Systems** Mohamed Elhoseny,Xiaohui Yuan,Salah-ddine Krit,2022-06-27 This book is the proceeding of the 1st International Conference on Distributed Sensing and Intelligent Systems ICDSIS2020 which will be held in The National School of Applied Sciences of Agadir Ibn Zohr University Agadir Morocco on February 01 03 2020 ICDSIS2020 is co organized by Computer Vision and Intelligent Systems Lab University of North Texas USA as a scientific collaboration event with The National School of Applied Sciences of Agadir Ibn Zohr University ICDSIS2020 aims to foster students researchers academicians and industry persons in the field of Computer and Information Science Intelligent Systems and Electronics and Communication Engineering in general The volume collects contributions from leading experts around the globe with the latest insights on emerging topics and includes reviews surveys and research chapters covering all aspects of distributed sensing and intelligent systems The volume is divided into 5 key sections Distributed Sensing Applications Intelligent Systems Advanced theories and algorithms in machine learning and data mining Artificial intelligence and optimization and application to Internet of Things IoT and Cybersecurity and Secure Distributed Systems This conference proceeding is an academic book which can be read by students analysts policymakers and regulators interested in Distributed Sensing Smart Network approaches Smart Cities IoT Applications and Intelligent Applications It is written in plain and easy language and describes new concepts when they appear first so that a reader without prior background of the field finds it readable The book is primarily intended for research students in sensor
