Introduction to Cataloging and Classification Daniel N. Joudrey, Arlene G. Taylor, David P. Miller, 2015-09-29 A new edition of this best selling textbook reintroduces the topic of library cataloging from a fresh modern perspective Not many books merit an eleventh edition but this popular text does Newly updated Introduction to Cataloging and Classification provides an introduction to descriptive cataloging based on contemporary standards explaining the basic tenets to readers without previous experience as well as to those who merely want a better understanding of the process as it exists today The text opens with the foundations of cataloging then moves to specific details and subject matter such as Functional Requirements for Bibliographic Records FRBR Functional Requirements for Authority Data FRAD the International Cataloging Principles ICP and RDA Unlike other texts the book doesn't presume a close familiarity with the MARC bibliographic or authorities formats ALA's Anglo American Cataloging Rules 2nd Edition revised AACR2R or the International Standard Bibliographic Description ISBD Subject access to library materials is covered in sufficient depth to make the reader comfortable with the principles and practices of subject cataloging and classification In addition the book introduces MARC BIBFRAME and other approaches used to communicate and display bibliographic data Discussions of formatting presentation and administrative issues complete the book questions useful for review and study appear at the end of each chapter

Cataloging and Classification Lois Mai Chan, Athena Salaba, 2015-12-14 The fourth edition of the late Lois Mai Chan's classic Cataloging and Classification covers the analysis and representation of methods used in describing organizing and providing access to resources made available in or through libraries Since the last edition published in 2007 there have been dramatic changes in cataloging systems from the Library of Congress The most notable being the shift from AACR2 to Resource Description and Access RDA as the new standard developed by the Library of Congress With the help of the coauthor Athena Salaba this text is modified throughout to conform to the new standard Retaining the overall outline of the previous edition this text presents the essence of library cataloging and classification in terms of three basic functions descriptive cataloging subject access and classification Within this framework all chapters have been rewritten to incorporate the changes that have occurred during the interval between the third and fourth editions In each part the historical development and underlying principles of the retrieval mechanism at issue are treated first because these are considered essential to an understanding of cataloging and classification Discussion and examples of provisions in the standards and tools are then presented in order to illustrate the operations covered in each chapter Divided into five parts a general overview record production and structure encoding formats and metadata records RDA subject

access and controlled vocabularies and the organization of library resources each part of the book begins with a list of the standards and tools used in the preparation and processing of that part of the cataloging record covered followed by suggested background readings selected to help the reader gain an overview of the subject to be presented This book is the standard text for the teaching and understanding of cataloging and classification
