**Project of Positivism in International Law** Mónica García-Salmones Rovira,2013-11-28 International legal positivism has  
 been crucial to the development of international law since the nineteenth century It is often seen as the basis of mainstream  
 or traditional international legal thought The Project of Positivism in International Law addresses this theory in the long  
 standing tradition of critical intellectual histories of international law It provides a nuanced analysis of the resilience of the  
 economic positivist theory and shows how influential its role was in shaping the modern frameworks of international law The  
 book argues that the rise of positivist international law was inseparable from philosophical developments placing the notion  
 of conflict of interests at the centre of collective life Where previously international thought was dominated by notions of the  
 right the just and the good increasingly international relations became viewed as interests in need of harmonisation In this  
 context international law was re founded as the universal law that could harmonise the interests of both public and private  
 international entities The book argues that these evolutions in philosophical thought were bound up with the consolidation of  
 capitalism and with the ideas about human existence and human nature which emerged in that process It provides an  
 innovative analysis of the selected biography of ideas which it presents including a detailed focus on the work of Hans Kelsen  
 one of the leading positivist thinkers of the twentieth century It also argues that the work of Lassa Oppenheim should be  
 included within this analysis as providing some of the key founding texts of positivism in international law This book will be a  
 fascinating read for scholars and students of international legal theory historians of ideas and legal philosophers     **The**
