R. Fontaine,Klaus R. Scherer,Cristina Soriano,2013-08-01 Publications on emotion and the affective sciences in general have exploded in the last decade Numerous research teams and individual scholars from many different disciplines have published research papers or books about many different aspects of emotions and their role in behaviour and society However One aspect of emotional research that has been somewhat neglected is the way in which emotional terms translate into other languages When using terms like anger sadness fear disgust and joy for so called basic emotions as well as terms like shame guilt pride regret and contempt for more complex emotions it is naturally assumed that the emotion terms used for research in the native language of the researchers and translated into English are completely equivalent in meaning However this is not generally the case In many cases there is no direct one to one relationship between an English term and a term in an alternative language In fact there can be significant differences in the way that these seemingly similar emotional terms can be applied across various languages with important implications for how we review and appraise this work This book presents an extensive cross cultural and cross linguistic review of the meaning of emotion words adopting a novel methodological approach Based on the Component Process Model the authors developed a new instrument to assess the meaning of emotion terms This instrument the GRID questionnaire consists of a grid of 24 emotion terms spanning the emotion domain and 142 emotion features that operationalize five emotion components Appraisals Bodily reactions Expressions Action tendencies and Feelings For the operationalization of these five emotion components very different emotion models from the Western and the cultural comparative emotion literature were taken into account Components of Emotional Meaning includes contributions from psychological cultural comparative and linguistic perspectives demonstrating how this new instrument can be used to empirically study very different research questions on the meaning of emotion terms The implications of the results for major theoretical debates on emotion are also discussed For all researchers in the affective sciences this book is an important new reference work Works: Nature's serial story Edward Payson Roe,1902 **Edinburgh Medical Journal** ,1880 Studies in the osteopathic sciences. v. 3, 1911 Louisa Burns,1911 *Studies in the Osteopathic Sciences: The physiology of consciousness* Louisa Burns,1911 *The Band of mercy advocate* ,1888 The Physiology of Consciousness Louisa Burns,1911 **The Eclectic Magazine of Foreign Literature, Science, and Art** ,1898 The Literary Digest ,1898 **Digest; Review of Reviews Incorporating Literary Digest** ,1898 **Digest** ,1898 **The Science of Health** ,1875 The Investigator ,1843 Liam O'Flaherty the Storyteller Angeline A.
