Animal Models In Human Psychobiology:

Animal Models in Human Psychobiology George Serban, 2012-12-06 In March 1974 an International Symposium was held at the Harmonie Club in New York to discuss a highly pertinent problem in today's research the Relevance of the Animal Psychopathological Model to the Human This meeting was sponsored by the Kittay Foundation which brought together an outstanding group of scientists involved in widely different fields of research This volume it is hoped will convey the tone of lively and cordial exchange between internationally renowned investigators including Dr I Eibl Eibesfeldt from Germany Dr Robert A Hinde from England Dr Edward F Domino from Michigan and Dr Pierre Pichot from France Chairman of the Steering Committee In his welcoming address Mr Sol Kittay reminded us that man has achieved remarkable control over his environment but not over himself and he suggested that we should reexamine our ancestral origins and search in animal behavior for clues to the understanding of normal and abnormal behavior in man

Animal Models of Human Psychology Kenneth Joel Shapiro, 1998 After surveying current research practices and model development strategies the author examines animal models of eating disorders from both scientific and ethical points of view He exposes logical inconsistencies in the study of animals as models for human behavior and concludes that such research has little to contribute The foreword is by noted chimpanzee researcher Jane Goodall Annotation copyrighted by Book News Inc Portland OR
