Animal Models Disorders Of Eating Behaviour And Body Composition

Scott C. Dulebohn

Animal Models Disorders Of Eating Behaviour And Body Composition:

Animal Models J.B. Owen, J.L. Treasure, D.A. Collier, 2013-03-14 The book aims to review knowledge on the disorders of eating behaviour and body composition in some of the non primate higher animals and to relate these to similar conditions in humans With advances in understanding the nature of these disorders and their biological basis it seems timely to assess what cross species comparisons can tell us about the general underlying factors at work This may also help to delineate what may be a general biological basis that humans share with their higher animal comrade species and what may distinguish human from non human particularly in a cultural context This could help in combating better the problems of these conditions in the animal species as well as in man and in suggesting well based preventive measures As far as people are concerned the last two decades of the 20th century have shown a significant increase in obesity in the richer countries particularly the USA Table 1 Possibly associated with the obesity boom there is an increasing awareness of other disorders of eating behaviour and body composition These range from anorexia nervosa at the other end of body composition to obesity to others such as bulimia with more variable effects on body composition

Animal Models J.B. Owen, J.L. Treasure, D.A. Collier, 2001-10-31 This book deals with a novel aspect of a topical problem that is of widespread concern Obesity and other eating disorders are significant human health problems that are proving highly resistant to prevention and cure The recognition of important genotype environment interaction in the causation of these problems and of the extensive genetic homology of higher animals justifies the importance of cross species comparisons The book covers observations made on animals in the wild as well as experimental data on laboratory animals and farm animals in order to lay out the basic genetic and environmental factors underlying the control of appetite including diet selection and body weight Breakdown in these intricate mechanisms are then compared to examine the possible common candidate genes and their interaction with non genetic factors particularly the availability of diet choice and of levels of body activity Animals have much to tell us about these mysteries and may significantly aid progress in dealing with what are still highly intractable and serious diseases of the modern world

Diets and Dieting Sander L. Gilman, 2008-01-23 Diets and dieting have concerned and sometimes obsessed human societies for centuries The dieters regime is about many things among them the control of weight and the body the politics of beauty discipline and even self harm personal and societal demands for improved health spiritual harmony with the universe and ethical codes of existence In this innovative reference work that spans many periods and cultures the acclaimed cultural and medical historian Sander L Gilman lays out the history of diets and dieting in a fascinating series of articles

Psychopharmacology Bulletin ,1997 **Psychopharmacology Bulletin** ,1966

Handbook of Assessment Methods for Eating Behaviors and Weight-Related Problems David B. Allison, 1995 Through a combination of standardized formatting and meticulous editing this volume achieves a rare and appreciable level of integration and cohesiveness

Disorders of Eating Behaviour Ettore Ferrari, Francesca Brambilla, 1986 Hardbound This

volume includes the invited lectures and some of the oral communications delivered at the International Symposium Disorders of Eating Behavior A Psychoneuroendocrine Approach held in Pavia Italy on September 12th 15th 1985 The purpose of the symposium was to bring up to date the knowledge on every type of pathology related to food intake In this context anorexia nervosa bulimia and obesity may converge into a continuum in eating disorders possibly based on common pathogenetic mechanisms Many different factors may be responsible for these phenomena and in this volume they have been evaluated together in order to improve our understanding of the pathogenesis of the different syndromes and to propose more fruitful therapeutic approaches A compendium of this kind has been long awaited and should herald a new era of research in the field
