Animal Drive The Learning Process Volume 1:

Imitation in Animals and Artifacts Chrystopher L. Nehaniv, Kerstin Dautenhahn, 2002 An interdisciplinary overview of current research on imitation in animals and artifacts [A New Look at New Realism](#) Eric Charles, 2017-09-08 This volume brings to the attention of contemporary readers a tradition of psychological thought that has received little attention over the last century Psychology's history has been unimaginatively presented as a fight between behaviorists and mentalists A third alternative the New Realism which cuts through that dichotomy has been lost The New Realism was indeed once new This volume provides a glimpse of how this school of thought attempted to redefine the notion of mental processes including consciousness in psychological theorizing Holt's rejected the nativity of iconoclastic Watsonian behaviorists and thus the New Realism was thoughtful in ways that behaviorist social engineering was not The implications of these innovations in psychological theorizing are traced from the beginning of the twentieth century to the contemporary period The contributors provide these intellectual links along with efforts to look at the relatedness of the human organism and its world At their beginning these ideas are embedded in a reverence for William James's work particularly his later Radical Empiricism In contemporary psychology this legacy has given us the framework of ecological psychology as we know it today and provides the basis for several modern critiques of cognitive psychology The present volume opens the door for future historical inquiries This is an exemplary addition to the series on the History of Psychological Ideas **Synthesizing Nature-nurture** Gilbert Gottlieb, 2014-09-19 This volume provides a primarily nontechnical summary of experimental and theoretical work conducted over the course of 35 years which resulted in a developmental framework capable of integrating causal influences at the genetic neural behavioral and ecological levels of analysis It describes novel solutions to the nature nurture problem at both the empirical and theoretical levels Following field observations laboratory experiments led to the discovery of the nonobvious prenatal experiential basis of instinctive behavior in two species ground nesting mallard ducklings and hole nesting wood ducklings This work also describes the experiences that lead to the rigid canalization of behavioral development as well as the social and sensory experiences that favor the continuance of flexibility The author also describes in detail a developmental psychobiological systems view that supports a behaviorally and psychologically mediated pathway to evolutionary change in humans and other species Written in a way that is readable to even the nonspecialist the text is accompanied by numerous photographs that illuminate and add personal meaning to the written words Readers will be engaged by the emphasis on the human aspect of the scientific enterprise [The Social Life of Monkeys and Apes](#) Solly Zuckerman, Solly Baron Zuckerman, 1999 First Published in 1999 Routledge is an imprint of Taylor Francis an informa company **The Social Life Of Monkeys And Apes** S. Zuckerman, 2013-11-05 This is Volume IV of four in a collection on Comparative Psychology Originally published in 1932 this study is referred to as a classic in both historical terms and its usefulness in the study of primates **Thinking in Psychological Science** Jaan Valsiner, 2011-12-31 This book explores

the development of ideas in psychology's past. It is the initial volume in a series intended to shape such ideas into a valuable resource for the discipline's future. Scientists in general are known to ignore their own history, considering it to be a graveyard of failures. In *Thinking in Psychological Science*, selected ideas of key figures in the cognitive, comparative, and developmental sides of psychology—Karl Duncker, Karl Bihler, Tamara Dembo, Zing Young Kuo, C. Lloyd Morgan, Alexander Chamberlain, and Arnold Gesell—are traced, and the social contexts of their ideas are given a collective analysis focusing on the potential of these ideas for the present state of psychology. Representing the scientist as hero has become a necessary component when applying for research monies from governmentally controlled funding agencies. Yet the reality is just the opposite: Science is not just the product of heroes; it is the product of many individuals who often search for solutions to basic problems throughout their lifetimes, while only a few arrive at breakthroughs. Still, familiarity with the flow of thought in the efforts to solve the basic problems of humankind is necessary for any understanding of creativity. This book analyzes the processes involved in the search for solutions to major theoretical problems of development: Kuo, Gesell, action and cognition, Bihler, Bunker Dembo, and methodology, Morgan. Ultimately, this is an exciting volume that reveals real science in the making. *Thinking in Psychological Science* will be of interest to students of the social sciences and intellectual history. It is ideal for graduate and upper-level undergraduate courses in psychology, the sociology of science, and cognitive science.
