Animal Societies From Bee To Gorilla:

Animal Societies Rémy Chauvin,1963 *Animal Societies* Rémy Chauvin,1971 *Animal Societies From the Bee to the Gorilla*. Translated by George Ordish Remy Chauvin,1968 **Animal Societies, from the Bee to the Gorilla** Rémy Chauvin,1968 **A World In Transition: Humankind and Nature** Diederik Aerts,Jan Broekaert,Willy Weyns,2012-12-06

A World in Transition Humankind and Nature is appropriately entitled after its aim for an intrinsic property of reality change Of major concern in this era of transformation is the extensive and profound interaction of humankind with nature The global scale social and technological project of humankind definitely involves a myriad of changes of the ecosphere This book develops from the call for an interdisciplinary synthesis and respect of plurality acknowledging the evolving scientific truth to the need for an integrated but inevitably provisional worldview Contributors from different parts of the world focus on four modes of change i Social change and the individual condition ii Complex evolution and fundamental emergent transformations iii Ecological transformation and responsibility inquiries iv The economic ecological and socio technical equilibria Primarily concerned with the deep transformations of humankind and of the relationship between humans and nature it is addressed to a broad and thinking public that wants to be kept informed *Debugging the Link between Social Theory and Social Insects* Diane M. Rodgers,2008-11-15 During the nineteenth and early twentieth centuries natural and social scientists began comparing certain insects to human social organization Entomologists theorized that social insects such as ants bees wasps and termites organize themselves into highly specialized hierarchical divisions of labor Using a distinctly human vocabulary that reflected the dominant social structure of the time they described insects as queens workers and soldiers and categorized their behaviors with words like marriage slavery farming and factories At the same time sociologists working to develop a model for human organization compared people to insects relying on the same premise that humans arrange themselves hierarchically In *Debugging the Link between Social Theory and Social Insects* Diane M Rodgers explains how these co constructed theories reinforced one another thereby naturalizing Western conceptions of race class and gender as they gained prominence in popular culture and the scientific world Using a critical science studies perspective not previously applied to research on social insect symbolism Rodgers attempts to debug this theoretical co construction She provides sufficient background information to accommodate readers unfamiliar with entomology including in depth explanations of the terms used in the research and discussion of social insects particularly the insect sociality scale The entire premise of sociality for insects depends on a dominant understanding of high low civilization standards particularly the tenets of a specialized division of labor and hierarchy comparisons that appear to be informed by nineteenth century colonial thought Placing these theories in a historical and cross cultural context Rodgers explains why hierarchical ideas gained prominence despite the existence of opposing theories in the literature and how they resulted in an inhibiting vocabulary that relies more heavily on metaphors than on description Such analysis is necessary Rodgers argues because it

sheds light both on newly proposed scientific models and on future changes in human social structures Contemporary scientists have begun to challenge the traditional understanding of insect social organization and to propose new interdisciplinary models that combine ideas about social insect and human organizational structure with computer technologies Without a thorough understanding of how the old models came about residual language and embedded assumptions may remain and continue to reinforce hierarchical social constructions This intriguing interdisciplinary book makes an important contribution to the history and future of science and sociology *Bookseller and the Stationery Trades' Journal* ,1904 Books for College Libraries: Psychology, science, technology ,1975 **Library Journal** ,1968-10

Strategy in the Sex War Pat Milsom,1973 □□□□□□□□ ,1969 *Bee World* ,1969 The Paranormal Review ,1997

The Canadian Field-naturalist ,1969 *The New York Review of Books* ,1969 *A Bibliography on Animal Rights and Related Matters* Charles R. Magel,1981 This bibliography is restricted to literature in the English language with over 3200 entries it is also confined to the thought and practices of the Western world from Biblical times to 1980 Secular and Supernatural Frank Russell Barry,1969 Kaapse bibliotekaris ,1968 Issues for Nov 1957 include section Accessions Aanwinste Sept 1957 also published separately **The Book Buyer's Guide** ,1968 A Study of Child Variance ,1972
