## **Cracking Up The Work Of Unconscious Experience:**

*Cracking Up* Christopher Bollas, 1995 Explores the inner world of human experience and suggests that the rhythm of that experience is vital to individual creativity

**The Vitality of Objects** Joseph Scalia, 2002-01-30 One of the most interesting theorists in contemporary psychoanalysis Bollas emphasizes both the creativity of subjectivity itself and the key place of experience in the formation of psychical constructions and fantasy Anthony Elliott Centre for Critical Theory University of the West of England This eclectic collection of essays reflects the far reaching multi dimensional influence of Christopher Bollas Bollas galvanises our understanding of what happens when people encounter the objects the endlessly variegated content of external reality Each of us has our own unique idiom through which we endow objects a painting a football a stranger with special meaning Bollas has added depth to our understanding of these relationships with vitality rarely found in psychoanalytic writing The contributors to this volume offer definitions and illustrations that make Bollas thought accessible for those approaching his work for the first time and illuminating for those more familiar with his canon *The Vitality of Objects* reveals the possibilities for self expression and growth that figure in the process of object relations and shows how and why thinkers and artists from so many different perspectives are attracted to Bollas thought

Stanley Cavell and Philosophy as Translation Paul Standish, Naoko Saito, 2017-02-28 Translation exposes aspects of language that can easily be ignored renewing the sense of the proximity and inseparability of language and thought The ancient quarrel between philosophy and literature was an early expression of a self understanding of philosophy that has in some quarters at least survived the centuries This book explores the idea of translation as a philosophical theme and as an important feature of philosophy and practical life especially in relation to the work of Stanley Cavell The essays in this volume explore philosophical questions about translation especially in the light of the work of Stanley Cavell They take the questions raised by translation to be of key importance not only for philosophical thinking but for our lives as a whole Thoreau's enigmatic remark The truth is translated reveals that apparently technical matters of translation extend through human lives to remarkable effect conditioning the ways in which the world comes to light The experience of the translator exemplifies the challenge of judgement where governing rules and principles are incommensurable and it shows something of the ways in which words come to us opening new possibilities of thought This book puts Cavell's rich exploration of these matters into conversation with traditions of pragmatism and European thought Translation then far from a merely technical matter is at work in human being and it is the means of humanisation The book brings together philosophers and translators with common interests in Cavell and in the questions of language at the heart of his work

**Birth Passages** Theresa M. Krier, 2001 *Birth Passages* offers a provocative and eloquent challenge to the nostalgia for the maternal sometimes influenced by classic Freudian theory which pervades many discourses Theresa M Krier suggests an alternative to the common characterizations of the maternal as a force inspiring both desire and dread a force that must be repressed if subjectivity and culture are to be established Instead drawing on the work of Melanie Klein D W Winnicott and Luce Irigaray Krier seeks to establish a new model of the relationship between mother and infant one in which birth is seen not as the tragic ending to the prenatal union but rather as the child's claiming both distance from and proximity to this parent Krier's insightful readings of poetic works from antiquity the Middle Ages and the Renaissance show these texts in opposition to their cultures insistent nostalgia for the maternal Their authors she maintains recognize such longing as a symptom of a glamorous but false and disabling fantasy In her analysis of the *Song of Songs* Lucretius's *De rerum natura* Chaucer's *Parlement of Foules* Spenser's *Amoretti* and *Faerie Queene* and Shakespeare's *Love's Labor's Lost* and *The Winter's Tale* Krier details how the writings represent the intersubjective nature of birth

Forms of Life Andreas Gailus, 2020-09-15 In *Forms of Life* Andreas Gailus argues that the neglect of aesthetics in most contemporary theories of biopolitics has resulted in an overly restricted conception of life He insists we need a more flexible notion of life one attuned to the interplay and conflict between its many dimensions and forms *Forms of Life* develops such a notion through the meticulous study of works by Kant Goethe Kleist Nietzsche Wittgenstein Benn Musil and others Gailus shows that the modern conception of life as a generative organizing force internal to living beings emerged in the last decades of the eighteenth century in biological thought At the core of this vitalist strand of thought Gailus maintains lies a persistent emphasis on the dynamics of formation and deformation and thus on an intrinsically aesthetic dimension of life *Forms of Life* brings this older discourse into critical conversation with contemporary discussions of biopolitics and vitalism while also developing a rich conception of life that highlights rather than suppresses its protean character Gailus demonstrates that life unfolds in the open ended interweaving of the myriad forms and modalities of biological ethical political psychical aesthetic and biographical systems
