learns the act of parenting Parents without this privilege are large in number and to them parenting is a dark continent which they find difficult to navigate This book is written to inform inspire and impart knowledge about parenting in the 21st century The book would enable parents interact with their children in a way that would motivate them to be outstanding persons in life In this information age you cannot limit your child to how you were brought up or what you know because he she was born in another era The gamut of issues covered in this book will equip you to bring up your child to be successful in life Issues treated in this book will help you know healthy parenting methods that are best for your child The book contains a very broad mix of issues a parent would encounter at every stage of a child s life It is written from the perspective that a parent s job is for life and as such parents need help to sustain their long term commitment to their children Issues covered include character building instilling moral values into children basic life skills at every stage of life sexuality education and handling children with special needs While the information in this book is specifically for parents the information would be useful to fathers groups men s groups women s groups grandparents extended family members and childcare providers that have opportunities to relate to children Research now and again has shown that a family is more important to a child s school success than how much money the family makes or how much education the parents have No parent who has read this book should ever ask How can I make my child a success in life The social commentator Michael Novak wrote on the importance of family One unforgettable law has been learned through all the disasters and injustices of the last thousand years if things go well with the family life is worth living when the family falters life falls apart The goal of Maximized Parenting is to fill the knowledge gap in you that will make you a better parent as well as an inspiration to other parents of the 21st century Choose to be an intentional parent who will put in the needed time energy and efforts to raise successful children Know that expensive toys and vacations are a poor substitute for the valuable time you need to spend with your children Refuse to outsource your parenting duties to care givers and boarding schools and you will be a stakeholder in the next generations through your children who will pass on your legacies Remember when a parent dies one thing that cannot be buried with him her is his her impact on the lives of his her children those things become a living memorial in his her children *Raising Smart Kids For Dummies* Marlene Targ Brill,2011-04-22 So you wanna turn Junior into a smarty pants What parent doesn t Thing is kids nowadays are more independent than ever and aren t always receptive to what parents want In fact if you tell your kids that studying is good for them they re more than likely to mumble Yeah sure in your general direction and head off to do something fun Sharpening the minds of your youngsters presents more challenges than climbing Mt Everest and the responsibility of making your kids use more of their brain cells can be overwhelming even when you don t encounter resistance Raising smart kids requires long term commitment sacrifice and diligence not to mention the patience of a saint And as long as you don t obsess about being the perfect parent you will be able to enjoy your kids journey of self discovery right along with them But how do you accomplish this How do you overcome the resistance How do you tackle the

Linking Arms Pamela R. McDaniel, PhD, 2014-04-21 Navigating the world of disability services and programs is very frustrating and overwhelming Regardless of your career status or educational background when you learn that your child has a disability you begin a journey that takes you into a life filled with strong emotions and difficult choices that affect the entire family Another part of that journey is the interaction with many different professionals and specialists and the continuous need for information supports and services I began the journey of emotions and navigating the world of disability supports and services in 2001 when my son Cory was born He wasn't expected to live to one day I was told not to get my hopes up and that his brain hadn't fully developed Life as I knew it was over I felt like my life came to an abrupt halt My priorities and focus shifted I was now a mother advocate advanced researcher and full time prayer warrior I had to abandon my old way of thinking and depend on others for information and support as I learned to care for this special little boy My son is now eleven years old and I continue to navigate the world of disability to make sure Cory has the proper supports and services put in place and that he is included in his school and community I have learned a whole new set of skills in order to be a good mother and effective advocate for Cory I joined parents support groups to link with other families who could relate to my struggles concerns and frustrations It was in those support groups that I learned about other resources and agencies that could help me better understand my sons disabilities I became part of a community of parent leaders who advocated not only for the rights of their children but for the rights of all children who lived with a disability Parents of children with disabilities need to be encouraged to develop their potentials as leaders They generally have the most consistent knowledgeable ability on their childs development Training parents to be leaders allows them to build their confidence and the skills needed to advocate and work with the many professionals who

provide the healthcare and educational services for their children to have successful outcomes and a good quality of life I wrote this book to encourage parents advocates and caregivers who take care of children with disabilities to educate them on the importance of leadership development and empower them in their journey Developing parent leadership is a continuous process I believe it takes parents training parents and forming a support network to give them the opportunity for personal growth reflection and knowledge to gain skills to function in leadership roles that effect change for children with disabilities It is so important for the parent voice to be heard This book provides parents with the basic knowledge on developing leadership skills and gives them an understanding of diverse learning styles and leadership competencies I am the parent of a child who is medically fragile I know the feeling of being overwhelmed and alone So I encourage all of you who are reading this book to get connected Get involved with a parents support group and register for trainings to help develop advocacy and leadership skills necessary to navigate the disability system Its not enough to just read about leadership it takes getting involved and putting theory into practice
