Creating Industrial Capacity Towards Full Employment:

Creating Industrial Capacity Jonathan Michie, John Grieve Smith, 1996 What are the economic prospects for Britain and the other major world economies over the coming years Creating sustained economic growth and tackling unemployment remain centre stage in economic policy debate across the globe and look set to remain there for the foreseeable future This book represents a major new contribution to the analysis of these issues and to the debate on appropriate policy options A key obstacle to the restoration of full employment is the erosion of industrial capacity to the point where it is no longer adequate for employing the available workforce even if the necessary demand for the output is there Rebuilding that capacity is essential if demand is to be allowed to increase sufficiently to bring levels of unemployment significantly below those prevailing in recent years Decisions on capacity rest on demand prospects while demand management is inhibited by fears that capacity shortages will lead to renewed inflation The particular problems and the differing contexts for policy action in Britain the European Union the US and Japan are all analysed in separate chapters In addition to a close scrutiny of the evidence and arguments about capacity problems the book looks more widely to issues of business systems City industry relations and the role of international business and governance systems in shaping economic and industrial policy The book is divided into four main sections Demand Capacity and Employment Industrial Problems and Policies International Lessons and Policy Directions for Policy This book will inform economic policy debates on both sides of the Atlantic It will be useful reading for students of macro and industrial economics and for all those interested in the business or economic environment

Competitiveness Strategy in Developing Countries Ganeshan Wignaraja, 2003-10-04 Globalization and structural adjustment offer many opportunities for export orientated industrialization in developing economies As a group competitiveness in the developing countries has improved but while East Asian economies have had rapid export growth and technological upgrades South Asian and African economies have lagged behind Old structures institutions behavioural patterns and public policies are ill adapted to deal with the challenges posed by technological change and economic liberalization Consequently there is an urgent need for change in government and private sector attitudes and strategies This volume seeks to generalise the lessons across developing country and enterprise cases and sheds light on which trade and industrial strategies and instruments work best and which do not work in relation to manufacturing competitiveness **The Political Economy of Competitiveness** Michael Kitson, Jonathan Michie, 2015-12-22 The Political Economy of Competitiveness offers an original perspective on the relationship between economic theory and policy It places the issues within an accessible political economy perspective Rejecting the narrowness of mainstream economics the authors deploy an interdisciplinary approach to the problem of economic growth placing it in its historical and political context Issues covered include trade theory and policy industrial decline and policy markets competition and innovation globalisation unemployment and government policy The book provides a valuable guide to the major economic policy issues for both economists and

business students *Employment and Economic Performance* Jonathan Michie, John Grieve Smith, 1997 With the end of the post war boom in the early 1970s the world economy has experienced large scale unemployment From an assumption that the unemployment problem had been solved and that full employment could be maintained through demand management techniques we now live in an entirely different world Any suggestion of a return to full employment is met with questions of whether such a thing is possible whether it would not lead to inflation or to excessive trade union power or in the case of individual economies to unsustainable balance of payment deficits The contributors to this volume ask whether full employment policies would be affordable Would they lead to yawning fiscal deficits which would in the end require a U turn in policy with unemployment reappearing This well informed and original contribution to current policy debate faces up to these questions and considers what would be involved in a move to much lower levels of unemployment

International Handbook on the Economics of Integration Miroslav N. Jovanović, 2011-01-01 International Handbook on the Economics of Integration edited by Miroslav Jovanovi provides timely and rich academic contributions to considerations of the widest array of integration related issues European integration has been providing an inspiration to a number of academics and researchers the Handbook is a recognition of the dynamic and strong solidarity of European integration At the same time the European Union often provided an example for integration schemes throughout the world which spread enormously since the mid 1990s Leading experts from all continents contributed to this Handbook which will be a valuable input into academic and policy making discussions and actions Jos Manuel Barroso President of the European Commission

Globalization, Growth, and Governance : Towards an Innovative Economy Jonathan Michie, John Grieve Smith, 1998-09-03 This book is about the processes of innovation at the global national and corporate levels It explores the contexts complexities and contradictions of innovation from a range of disciplinary perspectives and is divided into three main sections Globalization and Technology Innovation and Growth Governance Business Performance and Public Policy Interdisciplinary and international in its scope this book provides important evidence and arguments on the processes of innovation and in so doing addresses real challenges for policy makers managers and academics alike This book is about the processes of innovation at the global national and corporate levels It explores the contexts complexities and contradictions of innovation from a range of disciplinary perspectives and is divided into three main sections In the first on Globalization and Technology international contributors explore the links between changing systems of production and competitiveness the impact of new technology and innovation on international labour markets and the innovation practices of global firms In the section on Innovation and Growth a close look is taken at the innovation decisions and activities of individual firms The evidence in these chapters challenges many assumptions about the nature of competitive behaviour and the co operative links between firms In the section on Governance Business Performance and Public Policy the contributors examine the relationship between governance systems and firms innovation strategies and decisions assessing the capabilities and characteristics of different

models of capitalism The book concludes with a discussion of the most effective approach to industrial policy in the innovative economy Interdisciplinary and international in its scope this book provides important evidence and arguments on the processes of innovation and in so doing addresses real challenges for policy makers managers and academics alike
