Creation Scientists Answer Their Critics:

Creation Scientists Answer Their Critics Duane T. Gish, 1993 Discusses the arguments between creation scientists and evolutionists

The Scientific Case Against Scientific Creationism Jon P. Alston, 2003-09 Sociologist Jon P Alston offers a unique and clear analysis of the weaknesses of scientific creationism and intelligent design by identifying what creationists say when they reject evidence for evolution He demonstrates how scientific creationists accept non scientific statements that contradict established scientific knowledge Acceptance of anti evolutionary knowledge also demands acceptance of a literal six day creation and other statements contradicting scientific findings Few persons have read so closely the writings of scientific creationists to illustrate how anti scientific anti evolutionists become when they criticize the fact of evolution Creationists are forced to develop just so stories to defend their literal interpretations of Biblical scripture Alston finds creationists cannot defend their religious beliefs using established scientific methodologies and principles

A Scientific Analysis of the Creation Vs Evolution Debate Selva Sugunendran, 2016-06-03 In this book you will learn about the origins of life which has been a popular topic of debate for decades stirring division among groups of people regarding what to believe whether a higher entity created life Creation or a series of cosmic accidents evolution led to life developing on earth I have spent nearly eighteen months researching in order to find the seemingly elusive answers to the questions involving our very origins Where do we come from Who or what made us supreme being some cosmic event or both What should we believe in Creation or evolution Does it matter what we choose to believe I have selected thirty most often asked questions on this subject matter and have attempted to answer them by looking at both sides of the argument on creation and evolution fairly and scientifically and without taking sides

The Evolution of a Creationist Jobe Martin, Jobe Ralph Martin, 2004 In his book *The Evolution of a Creationist* Dr Jobe Martin chronicles his personal journey from traditional scientist to creationist He was a traditional evolutionist but it was his medical and scientific training that would go through an evolution when he began to study animals that challenged the scientific assumptions of his education Dr Martin has been exploring the evolution vs creation debate for the past 20 years His findings have been fascinating students around the world as he lectures on these remarkable animal designs that cannot be explained by traditional evolution

Science and Religion in Dialogue Raymond E. Grizzle, 2012-05-04 This book provides an overview of the history of interactions between science and religion with an emphasis on Christianity Raymond E Grizzle examines his own history of self reflection on science and religion focusing on what we have learned about the structure history and functioning of creation Both histories are interpreted as histories of discarded images largely consisting of the replacement of images of creation provided by religion with those provided by the natural sciences Grizzle assesses the major kinds of creationism that exist today and explores conflicts arising from young Earth creationism and intelligent design He also provides examples of productive dialogue regarding how science and religion might inform one another Two major themes that run throughout the book are the importance of underlying beliefs

and the reliability of modern science in producing a truthful understanding of the cosmos and the creation process Science and Religion in Dialogue concludes with some suggested principles for constructive self reflection and thoughts on how today s conflict might be replaced with productive discourse involving both science and religion **Creation Vs Evolution** Selva Sugunendran,2015-09-18 In this book you will learn about the origins of life which has been a popular topic of debate for decades stirring division among groups of people regarding what to believe whether a higher entity created life the Creation or a series of cosmic accidents Evolution led to life developing on Earth In this book Ill try to find the seemingly elusive answers to the questions involving our very origins Where do we come from Who or what made us a supreme being some cosmic event or both What should we believe in the Creation or Evolution Does it matter what we choose to believe I have attempted to look at both sides of the argument the Creation and Evolution fairly and scientifically without taking sides
