Creationism Science And The Law The Arkansas Case:

Creationism, Science, and the Law Marcel Chotkowski LaFollette, 1983 The documents and essays in this book portray the Arkansas creation science case emphasizing its implications for our understanding of the proper relationship between science and society The documents include the original Balanced Treatment for Creation Science and Evolution Science Act of 1981 the initial briefs of the plaintiffs and defendants in the case that challenged the Act the opinion of the court written by Judge William Overton and several pieces of followup legislation and legal opinion Essayists include attorneys from the New York firm of Skadden Arps Slate Meagher theologian Langdon Gilkey examines the interrelation of inquiry and belief anatomist Joel Cracraft describes the scientific response to creationism philosophers Michael Ruse and Larry Laudan debate the implications of the definition of science finally adopted by the court and historian Stephen Brush assesses the possible impact of creationism on education in the physical sciences Marcel Chotkowski La Follette editor of the journal *Science Technology Human Values* where much of this material was first collected has rounded out this case book by adding an introduction an extensive bibliography and a review of the media coverage of the trial

Evolution Vs. Creationism Eugenie C. Scott, 2009-08-03 Presents the scientific evidence for evolution and reasons why it should be taught in schools provides various religious points of view and offers insight to the evolution creationism controversy

Evolution Vs. Creationism Eugenie Carol Scott, 2005 Almost eighty years after the Scopes trial the debate over the teaching of evolution continues to rage There is no easy resolution it is a complex topic with profound scientific religious educational and legal implications How can a student or parent understand this issue which is such a vital part of education *Evolution vs Creationism* provides a badly needed comprehensive and balanced survey Written by one of the leading advocates for the teaching of evolution in the United states this accessible resource provides an introduction to the many facets of the current debate the scientific evidence for evolution the legal and educational basis for its teaching and the various religious points of view as well as a concise history of the evolution creationism controversy Each of the four sections of *Evolution vs Creationism* provides a resource that will assist the reader in better understanding these issues The first section addresses the nature of how evolution works as part of the scientific enterprise as well as a summary of the relationship between religious beliefs and science A section on the history of the controversy provides a handy synopsis of the lengthy struggles from before Darwin to the present day between advocates of creationism and the proponents of evolution A collection of primary source documents addressing cosmology law education and religious issues from all sides of the debate constitute the third section The book concludes with a selection of resources for further information for those who wish to study the topic in more depth

The Creation/Evolution Controversy Kary D. Smout, 1998-10-28 This rhetorical study of the various language strategies and competing worldviews involved in the 140 year argument between Biblical creationists and Darwinian evolutionists focuses on the 1860 Huxley Wilberforce debate the 1925 Scopes Monkey Trial and the 1981

Arkansas Creation Science Trial When Darwin published his *Origins of Species* in 1859 he initiated a debate about the origin of human life and the role of God in human affairs scarcely equalled in world history Smout traces the response of Biblical creationists to Darwinian evolutionists Looking carefully at the stories told and the tactics used by both sides he analyzes all available accounts of the original debate culminating in the 1860 Huxley Wilberforce debate the 1925 Scopes Monkey Trial and the 1981 Arkansas Creation Science Trial Professor Smout argues that both sides in the controversy use various language strategies to persuade the culture as a whole to see the world that they see and to enact their position as public policy As Smout illustrates the problem is that both sides rely on an inadequate conception of language as a namer of timeless realities rather than as an instrument used by human communities to achieve their goals He attempts to articulate a better view of language and to show how it might help solve intractable arguments such as this He argues that we should see language as a tool that shapes what we see and definitions of terms as political acts rather than statements of fact made by disciplinary experts An important analysis for students and scholars in rhetoric history religion and sociology [American Creationism, Creation Science, and Intelligent Design in the Evangelical Market](#) Benjamin L. Huskinson, 2020-08-19 In this compelling and thoroughly researched book Benjamin Huskinson demonstrates that just as there is broad diversity within evangelicalism so too there is broad diversity among creationists His work on the Intelligent Design movement is superb and he prompts me to rethink my long held conviction that Intelligent Design is merely the most recent evolutionary form of creationism This is a very fine book Randall Balmer Author of *Evangelicalism in America* and writer host of *In the Beginning The Creationist Controversy* Benjamin Huskinson's study of American creationism will be an eye opener for those who sit on the opposite side of the evolution debate He shows that far from being a unified assault on Darwinism the campaign was actually a sequence of separate movements launched by rival evangelical groups competing for influence within their own community Peter Bowler Author of *Monkey Trials and Gorilla Sermons Evolution and Christianity from Darwin to Intelligent Design* A thoughtful and careful analysis that throws as much light on the diversity of American evangelicalism as it does on Christian attitudes to evolutionary theory Huskinson offers a smart analysis of religious anti evolution movements which neither demonises nor ridicules but seeks to understand the tenets and beliefs of a movement far more complex and multivalent than most of us appreciate A must read for science communicators Philippa Levine Walter Prescott Webb Chair in History and Ideas University of Texas at Austin USA This book explores the cultural history of anti evolution efforts in the United States from 1960 to the present refuting several popular narratives about creation science in evangelical America Separating theological terms like creationism from cultural movements such as creation science and intelligent design in an evangelical marketplace of ideas it contests assumptions that evangelical movements against evolution are homogeneous and it argues that intelligent design is not an off shoot of the creation science movement It demonstrates that the rationale of creationist groups is relational as well as ideological showing that the social function of American creationism which is to

establish the boundaries of orthodox religion is key to understanding the competing strategies of creation science organisations

Analysis of Creationism in the United States from Scopes (1925) to Kitzmiller (2005) and its Effect on the Nation's Science Education System Elizabeth Watts, 2018 Creationism is based on a fundamental belief in the inerrancy of the bible and negatively affects science education because creationist proponents insist on the inclusion of supernatural explanations for the appearance of species in particular the origin of humans This detrimental effect on education is particularly relevant in the United States where almost 70% of the population rejects the idea of naturalistic evolution and the majority of American students struggle to meet the college readiness benchmarks in science and math This dissertation provides a comprehensive look at the issue from historical judicial and educational perspectives Twenty four legal cases in the United States regarding anti evolutionary strategies were analyzed in detail Strategic trends were identified ranging from the statewide banning of evolution in public schools to the required teaching of Creation Science The exact effect of creationist political activity was discerned through the analysis of state science standards and textbook adoption processes which illustrated the creationists ability to lobby for a diminished coverage of evolution in science standards and textbooks It was found that despite attempts made by scientific and educational agencies to provide guidelines such as the Next Generation Science Standards the majority of American state science standards continue to be sub par and one of the major flaws of these standards is the overall attempt to weaken the coverage of evolution throughout the standards A similar loss of quality occurs in textbooks since publishers engage in self censorship in order to avoid controversial topics such as evolution in order to prevent their books from being rejected An examination of the free choice learning materials revealed that creationist proponents are very active and successful in producing books films and museums for the sole purpose of promoting creationism Moreover a brief look at the creationist movement in Germany provided a powerful comparison to the United States and elucidated the key components necessary for a creationist movement to exist and flourish namely the presence of fundamentalist willing to fight to get anti evolutionary materials introduced into science classrooms This study provides new insights into the creationist phenomenon present not only in the United States but also increasingly present in European countries such as Germany Understanding the detrimental link between creationism and science education will help the science community realize that this topic needs to be continually readdressed and that it is imperative that these creationist trends are not dismissed as inconsequential

God's Own Scientists Christopher P. Toumey, 1994 For more than five years Christopher P Toumey talked with contemporary creationists joined in their Bible study and prayer groups and interviewed their leaders in order to understand their heartfelt opposition to the idea of evolution The modern creationist movement is Toumey argues much more than a narrow doctrine extrapolated from a handful of biblical verses rather it represents a broad cultural discontent with the moral disintegration of modern America and a remarkable faith in science itself

Cult Archaeology and Creationism Francis B. Harrold, Raymond A. Eve, 1987

UFOs and aliens unexplained mysteries religious cults diffusion creationism We are all familiar with beliefs about human life that lie outside traditional scientific boundaries Notions such as these are considered reasonable by vast numbers of us in the western world in our modern technological and educated cultures Understanding why this should be so and how we as a society might deal with these widespread pseudoscientific beliefs are the subjects at the heart of this study The authors specialists in anthropology archaeology sociology psychology and history explore creationism which claims that there is evidence to support a literal interpretation of the origins of the world and of humanity as narrated in the Book of Genesis and cult archaeology which encompasses a wide range of fantastic beliefs about our past Cult Archaeology and Creationism contains several essays on the history of pseudoscientific beliefs and their current manifestations as well as the results of a unique research project in which students at five campuses across the country were asked about their beliefs and about such background factors as their school experience and religious faith This expanded edition also includes two new essays one on Afrocentrism and another that views cult archaeology and creationism in the 1990s and beyond Law and Literature ,2002

Science under siege Peter Banks,Daniel Lunney,Chris Dickman,2012-11-01 On Saturday 29 November 2008 the Royal Zoological Society of NSW held a forum with the theme of Science under siege As the RZS is a zoological society zoology under threat became the secondary theme and the basis for selecting speakers This book records that forum with the papers developed for this book as the written word from the spoken presentations Papers that were presented as posters are included as are the edited plenary sessions which featured questions from the floor with answers and comments encouraged from anyone in the forum We were delighted that Mark Horstman from ABC Catalyst was willing to replace his peripatetic colleague Paul Willis who was nonetheless very happy to write the foreword There is a place for such skilled science communicators we need more of them and scientists at the lab bench or in the field or exploring computer models or those that have now taken a job in the policy world need to stay in touch with them Some might say that the title Science under siege seems a bit extreme but we invite you to examine the evidence as presented in this book What follows is an edited version of the introductory material that advertised the forum The title looks dramatic but if you ask yourself is anything killing the science in your area of interest you might be surprised that you come up with a point or two Then ask a wider set of questions such as are there any pressures that preclude people from doing good zoology do either political budgetary constraints impact on your field is science in the media a subject that influences the outcome of your work are there economic impediments to careers in zoology is the education mix in Australia right for this new century are the best researchers becoming full time administrators or the converse the poor researchers becoming the administrators can you place the Australian situation in an international context are there reduced opportunities for human interactions with the natural world is the virtual world killing reality and what are your predictions of the future To deal with such issues the Royal

Zoological Society of NSW has structured the day to emphasize a range of themes beginning with identifying the issues including those that are persistent and those that are emerging and encompassing palpable hits to science Direct and indirect hits to science include such matters as the withdrawal of funding subversion of science death by 1000 cuts redirection of funding to fashion issues and using the name of science to justify things that are really not justifiable The name of science is being dragged down We need to confront the ever present problem of ignoring the scientifically accurate for the politically correct This raises such questions as to whether basic skills in biology are not being acquired because of public concern based on extreme animal rights propaganda Good science is not optional but what can be done if you are under siege The answers include understanding the philosophy of science the legal perspective and asking what scientists are or should be doing Audience participation will be a central part of this forum The plenary sessions will address questions raised by the speakers and the posters and debate issues and consider options for future directions It is widely known that it is hard to pull a major paper together on this theme but so many scientists know of at least one matter that they would like to draw to public attention So short contributions are included Listen to the speakers present some overarching themes or compelling case studies contribute to the debate on the day then examine your stance on a variety of these subjects to see whether the day changes your view of this often cryptic aspect of zoology As editors we wish to acknowledge the skills of the referees all papers were refereed by two peers and the patience of the authors for what has been a long gap between the date of the forum and this publication By the end of 2008 the Royal Zoological Society of NSW along with everyone else was caught by the GFC Global Financial Crisis and we simply had to extend the length of the queue for publication We also reassessed our mode of publication The Council of the Society voted to publish this production as an ebook as well as a short print run for formal library deposit and other essential matters The ebook is open access to enhance the reach of the papers and the ideas At the same time the Royal Zoological Society of NSW signed a contract for a more international mode of access of the publications of the Society and papers are now available via Metapress <http://rzsnsw.metapress.com> Science remains under siege in our view and now we have been alerted to the range of issues it becomes easier to spot the small irritating closing of options that collectively amount to a denial of science and its relegation to an optional way of looking at the world During production of this book this matter became obvious on a number of fronts which led us to invite the paper by Rosie Cooney and colleagues to defend their science of kangaroo conservation and commercial harvesting from an attack on the science We also saw that this issue of science under siege needs more airing and the Royal Zoological Society of NSW is planning its forum for the end of 2012 to take up another strand of this theme by capitalizing on the lifelong insights of scientists under the rubric of grumpy scientists an ecological conscience of a nation This idea in fact derives directly from the suggestions in the plenary sessions by Nick Holmes and Charley Krebs We are also concerned for young scientists with science under siege manifesting often in a failure to create permanent careers for science graduates that advance science itself and zoology in

particular from flourishing and identifying problems and finding solutions If we want to conserve the native fauna of Australia then Australian zoologists will have to be key team members We contend that to put science under siege and zoology under threat we not only further imperil our native wildlife but also the careers of the small band of specialists that can see the issues find the problems implement solutions and evaluate the outcomes In short science under siege is not a light matter and no one in this forum thought so Read on form an opinion and speak up and publish your thoughts your examples and your solutions

Epperson Vs. Arkansas Jonathan L. Thorndike,1999 This landmark case found that an Arkansas law banning the teaching of Charles Darwin s theory of evolution was unconstitutional Until this point in time Creationism or the theory that says that God created the Earth and all of its creatures had been the only theory of human creation that was taught in Arkansas schools Susan Epperson was a biology teacher who challenged the Arkansas law and won
