Creative Destruction How Globalization Is Changing The Worlds Cultures:

Creative Destruction Tyler Cowen, 2009-01-10 Argued neatly cultural products that we think of as indigenous owe their existence to the cultural exchange brought about by trade Wall Street Journal A Frenchman rents a Hollywood movie A Thai schoolgirl mimics Madonna Saddam Hussein chooses Frank Sinatra s My Way as the theme song for his fifty fourth birthday It is a commonplace that globalization is subverting local culture But is it helping as much as it hurts In this strikingly original treatment of a fiercely debated issue Tyler Cowen makes a bold new case for a more sympathetic understanding of cross cultural trade Creative Destruction brings an economist s eye to bear on an age old question Are market exchange and aesthetic quality friends or foes On the whole argues Cowen they are friends Cultural destruction breeds not artistic demise but diversity Through an array of colorful examples from the areas where globalization s critics have been most vocal Cowen asks what happens when cultures collide through trade whether technology destroys native arts why and whether Hollywood movies rule the world whether globalized culture is dumbing down societies everywhere and if national cultures matter at all Scrutinizing such manifestations of indigenous culture as the steel band ensembles of Trinidad Indian handweaving and music from Zaire Cowen finds that they are more vibrant than ever thanks largely to cross cultural trade While some see cultural decline as a half empty glass Cowen sees it as a glass half full with the stirrings of cultural brilliance Cowen contends that because commerce is driving technology ideas goods services and people across borders more freely than ever before we are in the midst of an unprecedented boom in creativity all over the world Los Angeles Times

Understanding Rhetoric Eamon M. Cunningham, 2020-01-01 Understanding Rhetoric A Guide to Critical Reading and Argumentation is a composition textbook that outlines three essential skills rhetoric argument and source based writing geared towards newcomers and advanced students alike Though comprehensive in its coverage the book s focus is a simple one how to move beyond a gut reaction while reading to an articulation of what is effective and what is not while explicitly answering the most important question of Why This text gets at this central concern

in two fundamental ways First the text teaches composition as a cumulative process coaching you how to question challenge and expand on not just the readings you hold in your hands but also how to interrogate the internal processes of writing and thinking The book s blend of composition methods detail the cross point of product and process to turn reading and writing from a matter of coming up with answers to questions to learning what type of questions need to be asked in the first place The right questions the text argues are fundamentally rhetorical in nature Second the content of the practice based chapters is framed into a larger mesh of intellectual history to show how the writing and thinking you are doing today is continuous with a long history of writing instruction that goes back to the ancient world This book provides equal representation from classical and contemporary theory with the recognition that theory cannot be fully grasped without practice and practice cannot be fully understood without its theoretical antecedent After all you can t write outside the box until you know where the box is and what it looks like

Interculturality Between East and West Fred Dervin,Sude,Mei Yuan,Ning Chen,2022-02-05 This book urges readers to develop a radical capacity to unthink and rethink interculturality through multiple pluri perspectival and honest dialogues between the authors and their students This book does not give interculturality a normative scaffolding but envisages it differently by identifying some of its polyphonic textures China s rich engagement with interculturality serves to support the importance of being curious about other ways of thinking about the notion beyond the West only As such the issues of culture identity language translation intercultural competence and silent transformations amongst others are re evaluated in a different light This is a highly informative and carefully presented book providing scientific insights for readers with an interest in interculturality

America Transformed Gary J. Hytrek,Kristine M. Zentgraf,2008 Globalization the interconnection of the world culturally socially politically and economically has generated intense theoretical and practical concerns Is globalization inevitable What are the effects of globalization on social structures and individual perceptions What is the effect of globalization on societal level inequality America Transformed Globalization Inequality and Power examines these questions by analyzing the links among global processes and shifting patterns of stratification inequality and social mobility in the United States While many texts separate discussions of macro and micro level processes when examining globalization this book skillfully integrates general

macro level processes with specific reference to the micro level effects of globalization in the U S Exploring the critical dimensions of inequality class gender and immigration America Transformed situates the U S experience within the broader global context and fleshes out the mechanism through which global processes affect social stratification By examining the social construction of globalization the authors identify the key policy challenges of globalization and some of the innovative community based responses to social inequality America Transformed provides powerful insights into the contested dialectical relationship between global and local forces how globalization shapes stratification and inequality in the U S and how local communities attempt to mediate those changes

Neckties in the Tropics James E. Rauch, Vitor Trindade, 2005 Some cultural goods like clothes and films are consumed socially and are thus characterized by the same consumption network externalities as languages At the same time producers of new cultural goods in any one country draw on the stock of ideas generated by previous cultural production in all countries For such goods costless trade and communication tend to lead to the dominance of one cultural style increasing utility in the short run but reducing quality and generating cultural stagnation in the long run Increasing trade costs while keeping communication costs low may reduce welfare by stimulating production of cultural goods that are compatible with the dominant style thereby capturing consumption network externalities but that add little to the stock of usable ideas A reform of cultural policy suggested by our two country analysis could be to remove import restrictions in the smaller country and replace them with subsidies to the fixed costs of production of new cultural goods in its traditional style
