

# Fluid Regionalism and Ukrainian National Identities in the Light of Public Opinion Surveys

The current Russian-Ukrainian conflict can be analyzed as a result of the unfinished disintegration of the Soviet Union. At the same time, one of the most visible consequences of the tragic events in Ukraine since 2013–14 is a change in Ukrainian national identity. People's identities and attitudes towards identity issues, language, and political preferences changed in the course of the conflict and as a direct result of it. This presentation attempts to capture the dynamics of identity change after the Euromaidan Revolution in Ukraine and the beginning of the Russian-Ukrainian conflict. Based on the analysis of opinion polls, it shows how traumatic and nostalgic memory function in the Ukrainian public imagination and how these phenomena affect identity issues.

## **Anglo Ukrainian Studies In The Analysis:**

*Anglo-Ukrainian Studies in the Analysis of Scientific Discourse* Rom Harré, 1993 This study examines two aspects of science that have become important in the post logicist period It shows how the organization of scientific discourse is more clearly disclosed when it is analyzed as a persuasive rhetoric Logic itself shifts from being taken as a universal grammar to being seen as one among several devices for securing the conviction of readers or audiences This work provides a formal characterization of aesthetic criteria and an awareness of the influence of social factors from outside the scientific community It explores several ways in which their mutual influence can be identified

**Methods of Psychological Intervention** Gordon Sammut, Juliet Foster, Sergio Salvatore, Ruggero Andrisano-Ruggieri, 2017-01-05 Methods of Psychological Intervention bridges general psychological knowledge and specific interventions in various settings like education organizations and medical fields It addresses behaviors such as gambling family therapy and crime making it a key resource for psychology professionals

*The Existentialist Moment* Patrick Baert, 2015-08-20 Choice Outstanding Academic Title for 2015 Jean Paul Sartre is often seen as the quintessential public intellectual but this was not always the case Until the mid 1940s he was not so well known even in France Then suddenly in a very short period of time Sartre became an intellectual celebrity How can we explain this remarkable transformation The Existentialist Moment retraces Sartres career and provides a compelling new explanation of his meteoric rise to fame Baert takes the reader back to the confusing and traumatic period of the Second World War and its immediate aftermath and shows how the unique political and intellectual landscape in France at this time helped to propel Sartre and existentialist philosophy to the fore The book also explores why from the early 1960s onwards in France and elsewhere the interest in Sartre and existentialism eventually waned The Existentialist Moment ends with a bold new theory for the study of intellectuals and a provocative challenge to the widespread belief that the public intellectual is a species now on the brink of extinction

*People and Societies* Luk van Langenhove, 2010-04-05 Rom Harr has pushed the boundaries of our thinking about people and societies and has challenged the orthodox philosophy of science and social psychology His countless books and articles have inspired generations of scholars in philosophy psychology linguistics cognitive science and social theory The diversity of his work makes that some see him as a leading figure in the critical realist school of philosophy of science other as a key player in developing a social constructionist approach to psychology The present volume brings together a careful selection of his key writings and presents them in a framework that stresses the evolution of his thinking as well as the place of his thinking in ongoing debates in different disciplines The overall theme is the study of people and their ways of life This is the first book that gives readers a systematic introduction in the conceptual universe of this towering figure

*Ethnomusicology* Helen Myers, 1993 Complementing Ethnomusicology An Introduction this volume of studies written by world acknowledged authorities places the subject of ethnomusicology in historical and geographical perspective Part I deals with the intellectual trends that

contributed to the birth of the discipline in the period before World War II Organized by national schools of scholarship the influence of 19th century anthropological theories on the new field of comparative musicology is described In the second half of the book regional experts provide detailed reviews by geographical areas of the current state of ethnomusicological research *Objects of Social Science* Eleonora Montuschi,2003-12-01 Presents a clear and structured analysis of the Philosophy of Social Science across each of its main disciplines Anthropology Sociology History Economics and Geography Using a range of examples from specific social sciences the book both identifies the practical and theoretical procedures involved in the identification of the object and at the same time raises questions about the very objectivity of these procedures in analyzing the object **Harvard Ukrainian Studies** ,1990 Journal of Ukrainian Studies ,1991 *Books in Print* ,1994 International Communism and the Spanish Civil War Lisa A. Kirschenbaum,2015-07-28 This book provides an intimate picture of international communism in the Stalin era Focusing on Americans and Spaniards who worked or studied in Moscow and later participated in the Spanish civil war it uncovers the personal and political ties that linked communists to one another and the Soviet Union *Innovating the Social Sciences* Luk van Langenhove,2007 This is a book about the necessities and possibilities of innovations in the social sciences in order to realize societal changes The natural sciences became the dominant model for the social sciences resulting in positivism as ideology and in the organizational structuring of the social sciences into disciplines In order to overcome the problems of scientism a shift to a radical new ontological framework is necessary In parallel it is necessary to introduce participative research designs move concepts and theories from one discipline to another and focus upon developing worldviews Innovations in the social sciences are possible and necessary But for these to happen new societal pressures and demands will have to be present Changing the social sciences is not a voluntary process that can be undertaken by social scientists alone Publisher s website **Neighbours and Successors of Rome** Daniel Keller,Jennifer Price,Caroline Jackson,2014-05-30 Presented through 20 case studies covering Europe and the Near East *Neighbours and Successors of Rome* investigates development in the production of glass and the mechanisms of the wider glass economy as part of a wider material culture in Europe and the Near East around the later first millennium AD Though highlighting and solidifying chronology patterns of distribution and typology the primary aims of the collection are to present a new methodology that emphasises regional workshops scientific data and the wider trade culture This methodology embraces a shift in conceptual approach to the study of glass by explaining typological change through the existence of a thriving supra national commercial network that responded to market demands and combines the results of a range of new scientific techniques into a framework that stresses co dependence and similarities between the various sites considered Such an approach particularly within Byzantine and Early Islamic glass production is a pioneering concept that contextualises individual sites within the wider region By twinning a critique of archaeometric methods with the latest archaeological research the contributors present a foundation for glass research seen through the

lens of consumption demands and geographical necessity that analyses production centres and traditional typological knowledge In so doing they bridge an important divide by demonstrating the co habitability of diverse approaches and disciplines linking for example the production of Campanulate bowls from Gallaecia with the burgeoning international late antique style Equally the particular details of those pieces allow us to identify a regional style as well as local production As such this compilation provides a highly valuable resource for archaeologists anthropologists and art historians
