Animal Ark Ocean Special Lucy Daniels, Jenny Gregory, 2000-07-20 Science and Sensibility Michael Vincent McGinnis, 2016-03-22 If humans are to understand and discover ways of addressing complex social and ecological problems we first need to find intimacy with our particular places and communities Cultivating a relationship to place often includes a negotiating process that involves both science and sensibility While science is one key part of an adaptive and resilient society the cultivation of a renewed sense of place and community is essential as well Science and Sensibility argues for the need for ecology to engage with philosophical values and economic motivations in a political process of negotiation with the goal of shaping humans treatment of the natural world Michael Vincent McGinnis aims to reframe ecology so it might have greater trans scientific awareness of the roles and interactions among multiple stakeholders in socioecological systems and he also maintains that deep ecological knowledge of specific places will be crucial to supporting a sustainable society He uses numerous specific case studies from watershed coastal and marine habitats to illustrate how place based ecological negotiation can occur and how reframing our negotiation process can influence conservation restoration and environmental policy in effective ways *The Journal of the Bombay Natural History Society* Bombay Natural History Society, 1924

determined cadre of evolutionist scientists educators and media outlets The result of this concerted effort has been a shifting of public consciousness away from Biblical truth and into a new paradigm in which belief in some form of Darwinian evolution has become a Litmus test of acceptability in our society But is this paradigm shift founded on legitimate scientific evidence The answer to this question is a resounding NO Over the last several decades scientists in widely varied disciplines have refuted much of the evidence behind today s various competing evolution theories The time has finally come to expose evolution for what it is delusion Kenneth Lawrence was born in British Columbia Canada where he currently resides He has had an intense interest in science most of his life A believer in Darwinian evolution for many years Ken became a Christian at the age of twenty three but had difficulty accepting a straightforward reading of the Bible s account of origins for many years In his late forties Ken began to seriously investigate the scientific claims of evolution theory Nearly a decade of personal research has resulted in an invigorated faith in the God of the Bible and in the writing of this book
