Animal Neighbours

Henry Fielding, Howard Maynardier

Animal Neighbours:

Our Animal Neighbors Matthieu Ricard, Jason Gruhl, 2020-09-01 Winner of the Moonbeam Children's Animals Pets Non Fiction Gold Medal A story about the fundamental connection between animals and people and how we can treat all of Earth's creatures with compassion and empathy Furry polar bears playful sea otters slow sloths prickly porcupines and slimy snakes are just a few of the many animals we share our world with And even though we might not look the same or have the same needs as our animal neighbors we have more in common with them than we might think Our Animal Neighbors introduces children to the importance of treating all animals with the care and compassion they deserve We all want to experience love safety and respect and this book is the first step to instilling those values at an early age This planet is our home and we should all be free to live a prosperous life regardless of whether we have hands hooves scales or fur A serious message delivered with humor simplicity and charm makes this book an excellent purchase for families that value open ended discussions Also a good resource for classrooms and libraries that welcome diverse opinions and points of view School Library Journal

Badger Michael Leach, 2003 Each book in the Animal Neighbours series covers such topics as the life cycle of the featured animal its habitat food chains and threats and also gives clues on how to find the animal in the children's local environment Following the life cycle of the badger this book shows its life from a cub's first steps out of its den to finding a mate It looks at some of the different habitats that are the badger's home from urban gardens to remote woodlands and at some of the threats facing badgers today and why some people see them as pests The text also shows how you can be an animal detective and find out if a badger has been in your neighbourhood It includes an animal map locator map life cycle summary and unusual fact boxes

Just Fodder Josh Milburn, 2022-07-19 Animal lovers who feed meat to other animals are faced with a paradox perhaps fewer animals would be harmed if they stopped feeding the ones they love Animal diets do not raise problems merely for individuals To address environmental crises health threats and harm to animals we must change our food systems and practices And in these systems animals too are eaters Moving beyond what humans should eat and whether to count animals as food Just Fodder answers ethical and political questions arising from thinking about animals as eaters Josh Milburn begins with practical dilemmas about feeding the animals closest to us our pets or animal companions The questions grow more complicated as he considers relationships with more distance questions about whether and how to feed garden birds farmland animals who would eat our crops and wild animals Milburn evaluates the nature and circumstances of our relationships with animals to generate a novel theory of animal rights Looking past arguments about what we can and cannot do to other beings Just Fodder asks what we can should and must do for them laying out a fuller range of our ethical obligations to other animals
