instala una fértil interacción entre el texto y el lector atento La comparación entre las evidencias aportadas por la ciencia conduce a la reflexión y al asombro Sin embargo la impresión más frecuente que surge de esta lectura es lo bien fundamentada que es la esperanza pública ya que esta depende de nuestros verdaderos orígenes Por eso podemos afirmar que el tiempo utilizado en leer esta obra es una excelente inversión ya que además de estar escrita en un lenguaje sencillo conmueve su corazón y genera sentimientos de admiración ante los maravillosos hechos de la creación de Dios *En busca de los orígenes* Jean Flori, Henri Rasolofomasoandro, 2000 *Tras la evolución* Carlos Javier Alonso, 1999 [Index translationum](#), 1978 Philosophy Religion Social sciences Law Education Economy Exact and natural sciences Medicine Science and technology Agriculture Management Architecture Art History Sport Biography Literature **Fósiles Que Hablan** Felipe Saint, 1988-01-01 **Evolution and the Fossil Record** Keith Allen, D. Boucot, 1990-05-21 This book is the culmination of many years of research by a scientist renowned for his work in this field It contains a compilation of the data dealing with the known stratigraphic ranges of varied behaviors chiefly animal with a few plant and fungal and coevolved relations A significant part of the data consists of frozen behavior i e those in which an organism has been preserved while actually doing something as contrasted with the interpretations of behavior of an organism deduced from functional morphology important as the latter may be The conclusions drawn from this compilation suggest that both behaviors and coevolved relations appear infrequently following which there is relative fixity of the relation i e two rates of evolution very rapid and essentially zero This conclusion complies well with the author's prior conclusion that community evolution followed the same rate pattern In fact communities are regarded here as in large part expressions of both behavior and coevolved relations rather than as random aggregates controlled almost wholly by varied unrelated physical parameters tracked by organisms i e the concept that communities have no biologic reality being merely statistical abstractions The book is illustrated throughout with more than 400 photographs and drawings It will be of interest to ethologists evolutionists parasitologists paleontologists and palaeobiologists at research and post graduate levels
