Economical Computer Science a mixture between economics and computer science I am interested in both economics and technology What topic suits that combination better than Virtual Teams which have to work for economic reasons across distances and organizational borders all this with the help of the latest technology The challenge Not a lot was written about the subject Virtual Teams when I started to look for literature suitable for my thesis I hardly could find books in Sweden and the ones I finally chose I had to order from the US which is also a reason why this thesis is written in English because all the literature I used was written in English So it was quite a challenge but exciting to write about something new
