Creating Optimal Futures:

Selling the Future Ryan Moran, 2024-01-15 In *Selling the Future* Ryan Moran explains how the life insurance industry in Japan exploited its association with mutuality and community to commodify and govern lives. Covering the years from the start of the industry in 1881 through the end of World War II, Moran describes insurance companies and government officials working together to create a picture of the future as precarious and dangerous. Since it was impossible for individual consumers to deal with every contingency on their own, insurance industry administrators argued that their usage of statistical data enabled them to chart the predictable future for the aggregate. Through insurance companies and the state, they thus offered consumers a means to a perfectible future in an era filled with repeated crises. Life insurance functioned as an important modernist technology within Japan and its colonies to instantiate expectations for responsibility, to reconfigure meanings of mutuality, and to normalize new social formations such as the nuclear family as essential to life. Life insurance thus offers an important vehicle for examining the confluence of modes of mobilizing and organizing bodies, the expropriation of financial resources, and the action of disciplining workers into a capitalist system.

Routledge Handbook for Creative Futures Gabrielle Donnelly, Alfonso Montuori, 2022-12-30 As the uncertainty of global and local contexts continues to amplify, the *Routledge Handbook for Creative Futures* responds to the increasing urgency for reimagining futures beyond dystopias and utopias. It features essays that explore the challenges of how to think about compelling futures, what these better futures might be like, and what personal and collective practices are emerging that support the creation of more desirable futures. The handbook aims to find a sweet spot somewhere between despair and naive optimism, neither shying away from the massive socio-environmental planetary challenges currently facing humanity nor offering simplistic feel-good solutions. Instead, it offers ways forward, whether entirely new perspectives or Indigenous and Traditional Knowledge perspectives that have been marginalized within modernity, and shares potential transformative practices. The volume contains contributions from established and emerging scholars, practitioners, and scholar-practitioners with diverse backgrounds and experiences, a mix of Indigenous, Black, Asian, and White/Caucasian contributors, including women, men, and trans people from around the world in places such as Kenya, India, US, Canada, and Switzerland, among many others. Chapters explore critical concepts alongside personal and collective practices for creating desirable futures at the individual, community, organizational, and societal levels. This scholarly and accessible book will be a valuable resource for researchers and students of leadership studies, social innovation, community and organizational development, policy studies, futures studies, cultural studies, sociology, and management studies. It will also appeal to educators, practitioners, professionals, and policymakers oriented toward activating creative potential for life-affirming futures for all.
