Creation Of Dangerous Violent Criminals:

The Creation of Dangerous Violent Criminals Lonnie H. Athens, 1992 Lonnie Athens examines a problem that has long baffled experts and lay people alike How does a person become a dangerous violent criminal He explains how those who commit brutal crimes begin as relatively benign individuals who undergo lengthy at times tortuous development leading them to malevolence The process that Athens labels violentization encompasses four stages brutalization belligerency violent performance and virulency Athens uses vivid first person accounts gleaned from in depth interviews with nascent and hardened violent criminals to back up his theory producing a book that will appeal to a wide variety of readers interested in criminal justice law and sociology

Murdering Myths Judith W. Kay, 2005-06-03 In *Murdering Myths The Story Behind the Death Penalty* Judith Kay goes beyond the hype and statistics to examine Americans deep seated beliefs about crime and punishment She argues that Americans share a counter productive idea of justice that punishment corrects bad behavior suffering pays for wrong deeds and victims desire for revenge is natural and inevitable Drawing on interviews with both victims and inmates Kay shows how this belief harms perpetrators victims and society and calls for a new narrative that recognizes the humanity in all of us

Crime and Coercion M. Colvin, 2000-09-01 In a major new theory of criminal behavior Mark Colvin argues that chronic criminals emerge from a developmental process characterized by recurring erratic episodes of coercion Colvin s differential coercion theory which integrates several existing criminological perspectives lays out a compelling argument that coercive forces create social and psychological dynamics that lead to chronic criminal behavior While Colvin s presentation focuses primarily on chronic street criminals the theory is

also applied to exploratory offenders and white collar criminals In addition Colvin presents a critique of current crime control measures which rely heavily on coercion and offers in their place a comprehensive crime reduction program based on consistent non coercive practices

Why They Kill Richard Rhodes,2015-10-21 Why do some men women and even children assault batter rape mutilate and murder In his stunning new book the Pulitzer Prize winner Richard Rhodes provides a startling and persuasive answer Why They Kill explores the discoveries of a maverick American criminologist Dr Lonnie Athens himself the child of a violent family which challenge conventional theories about violent behavior By interviewing violent criminals in prison Dr Athens has identified a pattern of social development common to all seriously violent people a four stage process he calls violentization First brutalization A young person is forced by violence or the threat of violence to submit to an aggressive authority figure he witnesses the violent subjugation of intimates and the authority figure coaches him to use violence to settle disputes Second belligerency The dispirited subject determined to prevent his further violent subjugation heeds his coach and resolves to resort to violence Third violent performances His violent response to provocation succeeds and he reads respect and fear in the eyes of others Fourth virulency Exultant he determines from now on to utilize serious violence as a means of dealing with people and he bonds with others who believe as he does Since all four stages must be fully experienced in sequence and completed to produce a violent individual we see how intervening to interrupt the process can prevent a tragic outcome Rhodes supports Athens s theory with historical evidence and shows how it explains such violent careers as those of Perry Smith the killer central to Truman Capote s narrative In Cold Blood Mike Tyson preppy rapist Alex Kelly and Lee Harvey Oswald Why They Kill challenges with devastating evidence the theory that violent behavior is impulsive unconsciously motivated and predetermined It offers compelling insights into the terrible ongoing dilemma of criminal violence that plagues families neighborhoods cities and schools

Emotions and Fieldwork Sherryl Kleinman, Martha A. Copp, 1993 What is the place of emotions in fieldwork Do emotions hinder research or do they help the researcher to understand better those they are studying Qualitative researchers have mixed feelings about emotions and the effects on their research Consequently many fieldworkers allow themselves to have particular feelings such as closeness with participants and try to deny or get rid of emotions deemed inappropriate within the fieldwork community The significant costs associated with ignoring feelings are taken up in this volume as Kleinman and Copp explore links between emotions and analysis The authors examine how fieldworkers feelings about their professional identity their work and the people they study inform analyses The conclusion offers an extended example from one of the author s field studies to highlight how fieldworkers emotions can add power to qualitative analyses An appendix demonstrates how to weave emotions into fieldnotes and into preliminary analyses Of the many recent methodological contributions Sherryl Kleinman and Martha Copp s *Emotions and Fieldwork* offers a unique and important perspective one that should be taken seriously by quantitative and qualitative researchers alike No matter what variety of research one conducts Kleinman and Copp s methodological critique provides an important way of thinking about the research process *Theory and Methods* Kleinman and Copp move qualitative research into a new domain of discussion by focusing on the role of emotion in fieldwork Well written and tightly organized *Emotions and Fieldwork* is a groundbreaking contribution to the literature on ethnography and fieldwork *New Ethnographies* This is a valuable research monograph for practitioners and students of qualitative methods and stands in bold contrast to books that advocate leaving emotions at home when one goes to the field Kleinman and Copp understand the emotional complexities of fieldwork and the empowerment that may result from exploring feelings thoroughly Reading this book might ameliorate some of the culture shock that can occur for the novice who expects it all to work like following recipes in a cookbook *Qualitative Sociology*
