First Light G.R. Evans, 2013-11-19 Did the universe start with a bang or has it existed always Was there a supernatural being behind it all or just mindless forces The beginning of things has forever tested the limits of curiosity and such questions have both challenged atheists and inspired believers Ancient cultures resorted to myth and symbolism to tell vibrant stories

about human origins Later civilizations added philosophical and scientific explanations but these are not definitive The nature and meaning of existence the why as much as the how questions are in the end mysterious In this lively and wide ranging book G R Evans explores the world s myriad creation stories against the background of the biggest question there is what are we doing here Discussing Swahili legends that resemble the Book of Genesis Greek tales about the Titans Native American Inca and Mesopotamian mythologies and Vedic creation cycles that begin with a cosmic egg or seed the author surveys polytheist monotheist and dualist ideas about supernatural power Tracing the history of humanity as it has struggled over many millennia to make sense of itself The Creation Myth will attract students of religion history and philosophy and general readers alike
