**Creative Couples in the Sciences** Helena Mary Pycior, Nancy G. Slack, Pnina G. Abir-Am, 1996 This book explores and studies cross gender collaborations and provides the reader with a rich representation of different scientific disciplines national cultures institutional settings historical periods personalities and outcomes for the collaborative partners **For Better or For Worse? Collaborative Couples in the Sciences** Annette Lykknes, Donald L. Opitz, Brigitte Van Tiggelen, 2012-06-05 In this volume a distinguished set of international scholars examine the nature of collaboration between life partners in the sciences with particular attention to the ways in which personal and professional dynamics can foster or inhibit scientific practice Breaking from traditional gender analyses which focus on divisions of labor and the assignment of credit the studies scrutinize collaboration as a variable process between partners living in the nineteenth and twentieth centuries who were married and divorced heterosexual and homosexual aristocratic and working class and politically right and left The contributors analyze cases shaped by their particular geographical locations ranging from retreat settings like the English countryside and Woods Hole Massachusetts to university laboratories and urban centers in Berlin Stockholm Geneva and London The volume demonstrates how the terms and meanings of collaboration variably shaped by disciplinary imperatives cultural mores and the agency of the collaborators themselves illuminate critical intellectual and institutional developments in the modern sciences *Creative Collaboration* Vera John-Steiner, 2006 What is the true nature of thinking Can it best be understood as a solitary activity of a lone individual This book suggests that our grasp of creativity is impoverished because we fail to recognise the vital roles that partnerships collaborations friendships and communities play in our thinking learning and understanding Debating Contemporary Approaches to the History of Science Lukas M. Verburgt, 2024-01-11 Debating Contemporary Approaches to the History of Science explores the main themes problems and challenges currently at the top of the discipline s methodological agenda In its chapters established and emerging scholars introduce and discuss new approaches to the history of science and revisit older perspectives which remain crucial Each chapter is followed by a critical commentary from another scholar in the field and the author s response The volume looks at such topics as the importance of the global digital environmental and posthumanist turns for the history of science and the possibilities for the field of moving beyond a focus on ideas and texts towards active engagement with materials and practices It also addresses important issues about the relationship between history of science on the one hand and philosophy of science history of knowledge and ignorance studies on the other With its innovative format this volume provides an up to date authoritative overview of the field and also explores how and why the history of science is practiced It is essential reading for students and scholars eager to keep a finger on the pulse of what is happening in the history of science today and to contribute to where it might go next Women Scholars and Institutions Soňa Štrbáňová, Ida H.
