Rethinking Border Control for a Globalizing World Leanne Weber,2015-02-11 This book provides a new point of departure for thinking critically and creatively about international borders and the perceived need to defend them adopting an innovative preferred future methodology The authors critically examine a range of border domains including law citizenship governance morality

security economy culture and civil society which provide the means and justification for contemporary border controls and identify early signs that the dynamics of sovereignty and borders are being fundamentally transformed under conditions of neoliberal globalization The goal is to locate potential pathways towards the preferred future of relaxed borders and provide a foundation for a progressive politics dedicated to moving beyond mere critique of the harm and inequity of border controls and capable of envisaging a differently bordered world This book will be of considerable interest to students of border studies migration criminology peacemaking critical security studies and IR in general

Borderscaping: Imaginations and Practices of Border Making Dr Chiara Brambilla, Dr Jussi Laine, Professor Gianluca Bocchi, Professor James W. Scott, 2015-12-28 Using the borderscapes concept this book offers an approach to border studies that expresses the multilevel complexity of borders from the geopolitical to social practice and cultural production at and across the border Accordingly it encourages a productive understanding of the processual de territorialized and dispersed nature of borders and their ensuring regimes in the era of globalization and transnational flows as well as showcasing border research as an interdisciplinary field with its own academic standing Contemporary bordering processes and practices are examined through the borderscapes lens to uncover important connections between borders as a challenge to national and EU policies and borders as potential elements of political innovation through conceptual re framings of social political economic and cultural spaces The authors offer a nuanced and critical re reading and understanding of the border not as an entity to be taken for granted but as a place of investigation and as a resource in terms of the construction of novel geo political imaginations social and spatial imaginaries and cultural images In so doing they suggest that rethinking borders means deconstructing the interweaving between political practices of inclusion exclusion and the images created to support and communicate them on the cultural level by Western territorialist modernity The result is a book that proposes a wandering through a constellation of bordering policies discourses practices and images to open new possibilities for thinking mapping acting and living borders under contemporary globalization

Border Politics Nancy A. Naples, Jennifer Bickham Méndez, 2014 In the current historical moment borders have taken on heightened material and symbolic significance shaping identities and the social and political landscape Borders Defined broadly to include territorial dividing lines as well as sociocultural boundaries have become increasingly salient sites of struggle over social belonging and cultural and material resources How do contemporary activists navigate and challenge these borders What meanings do they ascribe to different social cultural and political boundaries and how do these meanings shape the strategies in which they engage Moreover how do these social movements confront internal borders based on the differences that emerge within social change initiatives Border Politics edited by Nancy A Naples and Jennifer Bickham Mendez explores these important questions through eleven carefully selected case studies situated in geographic contexts around the globe By conceptualizing struggles over identity social belonging and exclusion as extensions of border politics the authors capture the complex ways in which geographic

cultural and symbolic dividing lines are blurred and transcended but also fortified and redrawn This volume notably places right wing and social justice initiatives in the same analytical frame to identify patterns that span the political spectrum

Border Politics offers a lens through which to understand borders as sites of diverse struggles as well as the strategies and practices used by diverse social movements in today's globally interconnected world Contributors Phillip Ayoub Renata Blumberg Yvonne Braun Moon Charania Michael Dreiling Jennifer Johnson Jesse Klein Andrej Kurnik Sarah Maddison Duncan McDuie Ra Jennifer Bickham Mendez Nancy A Naples David Paternotte Maple Razsa Raphi Rechitsky Kyle Rogers Deana Rohlinger Cristina Sanidad Meera Sehgal Tara Stamm Michelle Te llez *Holding the Line* Ian Townsend Gault, Heather Nora Nicol, 2005 This volume contains contributions from twenty four scholars concerning the significance and implications of the world's borderlands in economic political and socio cultural contexts Together these essays explore the changing role of borders in a global world Are borders increasingly irrelevant under conditions of globalization or can a case be made to demonstrate their continuing importance at various levels of spatial activity Situating itself within a growing border literature *Holding the Line* argues that contemporary borders facilitate parallel processes of globalization and localization of political activity As such the essays adopt a holistic approach to understanding the impact of boundaries on both society and space They demonstrate that any attempt to create a methodological and conceptual framework for the understanding of boundaries must be concerned with the process of bounding rather than simply the means through which the physical lines of separation are delimited and demarcated This approach renders the notion of a borderless world highly problematic because the latter ignores the important and ongoing relationship between the functional role of borders in the bounding process and the symbolic role of borders as imagined social political and economic constructions embedded within a geographical text The changing characteristics of political boundaries during an era of globalization has become a great focus of interdisciplinary study and this book will appeal to scholars of political geography border studies and international relations

Journal of Borderlands Studies ,2014 **Governing Borders and Security** Catarina Kinnvall, Ted Svensson, 2014-09-19 This book explores and maps the relationship between borders security and global governance Theoretically the book seeks to establish to what degree and in what ways traditional notions of borders security and global governance are being eroded undermined and contested in the context of a globalising world Borders are increasingly being re conceptualised to account for connectivity as well as divisions at the same time as focus is shifting from permanence to permeability The ambivalence ascribed to bordering processes is at heart a security concern borders are not only entwined with state formation but are also attempts at governing securities identities and histories Proceeding from a critical rendering of statist conceptualisations of borders security and governance the book not only emphasises the politics of borders mobility and re locations but also provides a shared groundwork for interrogating the spatial conditions for bordering and border work as manifestations of a continuously deferred becoming rather than being A principal contribution

of the volume is its scrutiny of how borders are enacted and perceived in and through the everyday and of how such production and construal can make sense as acts of resistance to various forms of governing. Such a focus reveals the necessity of investigating how governing from afar affects the possibilities and tendencies to securitise as well as desecuritize within as well as beyond elite settings. This book will be of much interest to students of border studies, human geography, governmentality, global governance, and IR/critical security studies.

Continental Divides Rachel Adams, 2009-12. Rachel Adams explores the patterns of contact, exchange, conflict, and disavowal among the cultures that span the borders of Canada, Mexico, and the United States.

Hemispheric American Studies Caroline Field, Robert Steven Levine, 2008. Annotation: The book seeks to excavate the complex cultural history of texts and discourses across the ever-changing and stratified geopolitical and cultural fields that collectively comprise the American hemisphere.

The Political Geography of Clandestine Transnational Organizations in Southeast Asia Justin VanOverloop, Hastings, 2008. **Choice**, 2005. *Globalization on the Line* C. Sadowski-Smith, 2016-04-30. The essays in *Globalization on the Line* criticize the almost exclusive emphasis on the ethnically constituted trans nation whose function as an instrument of denationalization has become signified in the metaphorical use of the border. Contributors focus on the surge of a more diverse variety of cultural forms of citizenship in response to the dramatic change that the geographies of U.S. border areas have undergone and simultaneously held to shape at the end of the 20th century. In its attempt to move beyond examinations of denationalized diasporic formations at the border, several essays in the collection add an attention to the northern frontier, a hemispheric perspective that was originally spawned by imagining new forms of citizenship within U.S./Mexico transborder cultures. Instead of viewing globalization and nation states as two separate and opposed domains of theorization and politics, *Globalization on the Line* contextualizes U.S. borders within global processes that are currently reconstituting the relationship between nation states and private corporations at the site of U.S. borders. The volume thus adds to the almost exclusive focus on the counter-hegemonic diasporic trans nation, an emphasis on various forms of citizenship that have emerged in response to increasingly more globally organized entities and practices.

Border Politics Cengiz Günay, Nina Witjes, 2016-12-09. In the light of mass migration, the rise of nationalism, and the resurgence of global terrorism, this timely volume brings the debate on border protection, security, and control to the centre stage of international relations research. Rather than analysing borders as mere lines of territorial

demarcation in a geopolitical sense it sheds new light on their changing role in defining and negotiating identity authority security and social and economic differences Bringing together innovative and interdisciplinary perspectives the book examines the nexus of authority society technology and culture while also providing in depth analyses of current international conflicts Regional case studies comprise the Ukraine crisis Nagorno Karabakh the emergence of new territorial entities such as ISIS and maritime disputes in the South China Sea as well as the contestation and re construction of borders in the context of transnational movements Bringing together theoretical empirical and conceptual contributions by international scholars this Yearbook of the Austrian Institute for International Affairs offers novel perspectives on hotly debated issues in contemporary politics and will be of interest to researchers graduate students and political decision makers alike

Border Orientation in a Globalizing World Beth A. Simmons, 2019 While border politics have become an increasingly salient component of high international politics political scientists have made few attempts to systematically analyze variation in national border policy To make analytic headway in this area we develop the concept of border orientation to describe the extent to which the State is committed to the authoritative display of capacities to control the terms of penetration of its national borders We then introduce a first ever effort to develop a geo spatial database of the world s major architectural features along international borders We combine these new data with updated data on border walls to construct and validate a Bayesian latent variable model for generating estimates of each state s border orientation at the national dyadic and border crossing level
