THE BUDDHIST COSMOS

A comprehensive survey of the early Buddhist Worldview;
according to THERAVĀDA and SARVĀSTIVĀDA sources

Buddhist Cosmology

Bernard Lennox Broughton

Buddhist Cosmology:

Buddhist Cosmology Akira Sadakata, 1997 This extensively researched and illustrated volume offers Western readers a rare introduction to Buddhism's complex and fascinating views about the structure of the universe. The book begins by clearly explaining classical cosmology with its symmetrical India-centered universe and multitudinous heavens and hells and illuminates the cosmos's relation to the human concerns of karma, transmigration, and enlightenment. It moves on to discuss the Mahayana conception of the universe as a lotus flower containing uncountable realms, each with its own buddha. Then, examining changes in the notions of hell and the gods, the author traces Buddhism's gradual shift from a religion to a mythology. Throughout, treatment of Buddhism's historical, geographical, and doctrinal origins complements detailed cosmological descriptions. Finally, the author shows us how this ancient philosophy resembles the modern scientific view of the cosmos and how even today it can help us lead more fulfilling lives.

Buddhist Cosmology: Science and Theology in the Images of Motion and Light W. Randolph Kloetzli, Randy Kloetzli, 1989 Disagreements concerning the nature and extent of the universe constitute a focus of theological debate which permeates Buddhism at every level. While there have been numerous attempts to catalogue the details of the Buddhist cosmologies, none has attempted a general interpretation of their underlying intention. This work attempts to begin the process of interpreting the major phases of Buddhist cosmological speculation by seeing in them various dramas of salvation tailored to the philosophical and theological predilections of their respective traditions. To a large extent, this interpretation relies on an examination of continuities between the Buddhist cosmologies and those of the Hellenistic world as a whole. In the course of this study, two major cosmological traditions emerge: those which rely on metaphors of time and those which rely on metaphors of space. The former are associated with the Hinayana and the latter with the Mahayana forms of Buddhism. Each draws on images of motion and light to articulate its vision of the drama of salvation.

A Manual of Buddhist Philosophy William Montgomery McGovern, 1923 **Buddhist System of Education** V. Nithiyanandam, **A History of Indian Buddhism**

Akira Hirakawa, 1993-01-01 This comprehensive and detailed survey of the first six centuries of Indian Buddhism sums up the results of a lifetime of research and reflection by one of Japan's most renowned scholars of Buddhism. **Ancient Eurasian**

Cosmology: Myth, Order, and Creation AJ Carmichael, 2026-03-21 Long before modern science sought to measure the universe, the civilizations of ancient Eurasia were already asking the most profound question of all: how did everything begin? **Ancient Eurasian Cosmology: Myth, Order, and Creation** takes you deep into the intellectual and spiritual worlds of early societies where poets, priests, and philosophers constructed powerful visions of the cosmos. From the sacred hymns of India to the philosophical traditions that followed, this book explores how ancient thinkers understood creation not as a single event but as a dynamic interplay of order, transformation, and cosmic balance. Blending mythological narrative with emerging philosophical insight, this work reveals a universe alive with meaning. Discover how early cultures imagined layered worlds.

cyclical time and the hidden principles that governed existence Explore the role of ritual sound and sacred speech in sustaining cosmic order and uncover how humanity was seen not as separate from the universe but as an active participant within it Rich immersive and grounded in historical scholarship this book offers a compelling journey into the origins of cosmological thought and a deeper understanding of the ideas that continue to shape how we see the universe today

Creating the Universe Eric Huntington, 2019-01-22 Winner 2018 Edward Cameron Dimock Jr Prize in the Indian Humanities Buddhist representations of the cosmos across nearly two thousand years of history in Tibet Nepal and India show that cosmology is a rich language for the expression of diverse religious ideas with cosmological thinking at the center of Buddhist thought art and practice In *Creating the Universe* Eric Huntington presents examples of visual art and architecture primary texts ritual ideologies and material practices accompanied by extensive explanatory diagrams to reveal the immense complexity of cosmological thinking in Himalayan Buddhism Employing comparisons across function medium culture and history he exposes cosmology as a fundamental mode of engagement with numerous aspects of religion from preliminary lessons to the highest rituals for enlightenment This wide ranging work will interest scholars and students of many fields including Buddhist studies religious studies art history and area studies Art History Publication Initiative For more information visit <http://arthistorypi.org/books/creating-the-universe>

The Science of Chinese Buddhism Erik J. Hammerstrom, 2015-08-11 Kexue or science captured the Chinese imagination in the early twentieth century promising new knowledge about the world and a dynamic path to prosperity Chinese Buddhists embraced scientific language and ideas to carve out a place for their religion within a rapidly modernizing society Examining dozens of previously unstudied writings from the Chinese Buddhist press this book maps Buddhists efforts to rethink their traditions through science in the initial decades of the twentieth century Buddhists believed science offered an exciting alternative route to knowledge grounded in empirical thought much like their own They encouraged young scholars to study subatomic and relativistic physics while still maintaining Buddhism's vital illumination of human nature and its crucial support of an ethical system rooted in radical egalitarianism Showcasing the rich and progressive steps Chinese religious scholars took in adapting to science's rising authority this volume offers a key perspective on how a major Eastern power transitioned to modernity in the twentieth century and how its intellectuals anticipated many of the ideas debated by scholars of science and Buddhism today

Politics and Transcendent Wisdom Charles D. Orzech, 1998 *Politics and Transcendent Wisdom* presents a systematic theoretical framework for understanding the relationship between politics and religion in a variety of contexts This book examines the formation of national protection Buddhism in China and translates the key text of this important movement Showing that Buddhist notions of sovereignty were meant and were taken as more than mere metaphor Orzech examines the profound link between Buddhist notions of transcendence and the deployment of political authority in East Asia To this integration of philosophical tradition and

political history is brought a new understanding of Buddhist cosmology The contexts of Buddhism as state religion in fifth and eighth century China are examined in detail through extended consideration of the Transcendent Wisdom Scripture for Humane Kings Who Wish to Protect Their States the text that was the charter for Buddhist state cults in China Korea and Japan into the twentieth century The text first appeared during the fifth century as Buddhists were struggling to understand how their foreign religion and the foreign rulers of north China might be adapted to Chinese religious and political culture The Scripture for Humane Kings and the rites enjoined by it were one answer to these questions Three centuries later in the context of a fully sinified Buddhism the Tang dynasty Tantric master Pu k ung produced a new version of the text with new rites that served as the centerpiece of his vision of a Chinese Buddhist state modeled on esoteric lines The final section of this volume presents for the first time a full annotated translation of this important East Asian Buddhist text The Journey of Maps and Images on the Silk Road Philippe Forêt, Andreas Kaplony, 2008 This book covers new ground on the diffusion and transmission of geographical knowledge that occurred at critical junctures in the long history of the Silk Road Much of twentieth century scholarship on the Silk Road examined the ancient archaeological objects and medieval historical records found within each cultural area while the consequences of long distance interaction across Eurasia remained poorly studied Here ample attention is given to the journeys that notions and objects undertook to transmit spatial values to other civilizations In retracing the steps of four major circuits right across the many civilizations that shared the Silk Road The Journey of Maps and Images on the Silk Road traces the ways in which maps and images surmounted spatial historical and cultural divisions The Power of Stars Bryan E. Penprase, 2017-05-05 Completely revised and updated this new edition provides a readable beautifully illustrated journey through world cultures and the vibrant array of sky mythology creation stories models of the universe temples and skyscrapers that each culture has created to celebrate and respond to the power of the night sky Sections on the archaeoastronomy of South Asia and South East Asia have been expanded with original photography and new research on temple alignments in Southern India and new material describing the astronomical practices of Indonesia Malaysia and other Southeast Asian countries Beautiful photographs of temples in India and Asia have been added as well as new diagrams explaining the alignment of these structures and the astronomical underpinnings of temples within the Pallava and Chola cultures From new fieldwork in the Four Corners region of North America Dr Penprase has included accounts of Pueblo skywatching and photographs of ceremonial kivas that help elucidate the rich astronomical knowledge of the Pueblo people The popular Archaeoastronomy of Skyscrapers section of the book has been updated as well with new interpretations of skyscrapers in Indonesia Taiwan and China With the rapid pace of discovery in astronomy and astrophysics entirely new perspectives are emerging about dark matter inflation and the future of the universe The Power of Stars puts these discoveries in context and describes how they fit into the modern perspective of cosmology which has arisen from the universal human response to the sky that has inspired both ancient and modern cultures **Encyclopaedia of**
