## **Building Strategy From The Middle Reconceptualizing Strategy Process:**

Building Strategy from the Middle Steven W. Floyd, Bill Wooldridge, 2000-03-15 For much of its history the academic literature in strategy has focused on the actions and decisions of top managers The argument of Building Strategy From the Middle is that rapidly developing technologies and competitive dynamics heighten needs for enhanced organizational competencies which puts a premium on new ideas generated at the operating level and creates a shift in the strategic responsibilities within organizations Strategic leadership now occurs not only at the top but at all levels of the organization This ground breaking new book reframes the perspective taken in most strategy research in two key ways by describing organizational renewal from a middle level perspective and by reconceptualizing the theoretical basis for strategy process research Part I of the book Foundations reviews the existing literature on the strategy process including recent literature on strategic change renewal Part II New Theoretical Horizons builds the theoretical basis for a middle level perspective focusing on knowledge development social network analysis and organizational trust Part III Middle Level Perspective moves from synthesizing existing research toward the development of a model for conducting research from a middle level perspective
