Frontex and the Rising of a New Border Control Culture in Europe Antonia-Maria Sarantaki, 2023-03-02 This book examines the rapidly expanding EU agency's distinct role in EU border control showing that Frontex is a prominent border control actor that reshapes the EU borders by promoting a new border control culture. Bringing culture into the analysis of Frontex, this book offers an alternative in-depth understanding of the agency's function, focusing on the production and diffusion of border control assumptions and practices within a border control community. Based on data drawn from primary research at Frontex and two EU external borders, namely Lampedusa and Evros, this book examines Frontex's contribution to the emergence of a new border control culture in Europe, replacing the pre-existing Schengen culture. Compared with the existing literature on Frontex, this novel account takes into consideration the evolving nature of borders and border control, discussing three contemporary challenges for the established border control regime: Brexit, the COVID-19 pandemic, and hard security preoccupations such as the fallout from the Russian invasion in Ukraine and the weaponisation of migration at the Greek-Turkish land border. *Frontex and the Rising of a New Border Control Culture in Europe* will appeal to scholars and students of border management, EU studies, migration, geography, international relations, and security, along with policymakers and practitioners with an interest in EU border control and Frontex.

Patterns in Border Security Christian Leuprecht, Todd Hataley, Emmanuel Brunet-Jailly, 2022-12-12 How do security communities transform into security regimes? This book compares the construction of cross-border security regimes across five regions of the world to illustrate how trust emerges from the day-to-day relations of coordination, cooperation, or collaboration. *Patterns in Border Security: Regional Comparisons* studies the way borderland communities develop, implement, and align border policy to enhance their sense of security. Borders have been evolving rapidly in direct response to the multifaceted challenges brought on by globalization, which has had a nuanced impact on the way borders are governed and border security is managed. Taking a methodical comparative regional approach, this book identifies and contrasts determinants of nascent, ascendant, and mature border security regimes, which the book documents in seven regional case studies from across the globe. The findings identify conditions that give rise to cross-border and trans-governmental coordination, cooperation, or collaboration. Specifically, pluralistic forms of communication and interactions, sometimes far from the actual borderline, emerge as key determinants of friendly and trustful relations among both contiguous and non-contiguous regions. This is a significant innovation in the study of borders, in particular in the way borders mediate security. For six decades, international security studies had posited culture as the bedrock of security communities. By contrast, the book identifies conditions, a method, and a model for adequate and effective cross-border relations, but whose outcome is not contingent on culture. The

chapters in this book were originally published as a special issue of Commonwealth and Comparative Politics with a Foreword by the Secretary General of the World Customs Organization The Open Access chapters of this book available at <http://www.tandfebooks.com/doi/view/10.4324/9781003216926> have been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
