Building A Peace System:

Building a Peace System Robert A. Irwin,1989 **Peace System Analysis** Marije Luitjens,2026-01-01 This book introduces the Peace System Analysis a new framework for unpacking the complexity of peace and conflict processes Drawing on ethnographic research in Kosovo and Medellín it illustrates how mapping the links between different parts of a peace process helps uncover existing capacities that can reinforce long term peace The book argues that many peacebuilding models fail to capture the realities of conflict affected contexts before introducing the Peace System Analysis as a tool for examining four key components 1 local understandings of peace 2 obstacles to peace 3 capacities for peace and 4 trans scalarity of peace It then demonstrates its application in both Kosovo and Medellín revealing hidden dynamics interconnections and opportunities for transformation Bridging theory and practice this book connects debates on complexity theory critical peace studies and peace policy offering scholars policymakers and practitioners fresh insights and strategies for building peace

Teaching Peace amidst Conflict and Postcolonialism Christopher P. Davey,Cris Toffolo,Maria Paula Unigarro Alba,2023-05-26 In a world where post conflict and postcolonial countries struggle to heal from the past and meet new challenges peace education is often neglected and instrumentalized for political agendas Drawing on case studies from Afghanistan Bolivia Burundi Colombia Myanmar Nepal New Zealand Northern Ireland Sri Lanka and Uruguay this book shows that cultural and structural violence can in turn lead to direct violence An effective program of peace education responds to these dynamics meeting our urgent problems and opening up new opportunities for peacebuilding With this direction in mind this book addresses the practices of peace education from around the world The fundamental question answered here is can peace be taught especially where the scars of war and legacies of colonialism are entrenched in society Peace education is foundational to a more equitable future where global citizens share a planet in justice equity with human security and all the elements of sustainable resilient peace Foremost it is an essential pillar for societies scarred by violence

Peace Education, 3d ed. Ian M. Harris,Mary Lee Morrison,2014-01-10 Now in its third edition Peace Education provides a comprehensive approach to educating for a just and sustainable future It begins with religious and historical trends that have molded our understanding of peace and then presents a variety of ways to practice peace education in schools and communities and explains how it can motivate students The teaching and practice of peace education provides a basis of valuable knowledge about resolving conflicts and transforming violence without the use of force Instructors considering this book for use in a course may request an examination copy here *Building Peace* Craig Zelizer,Robert A. Rubinstein,2009 Even though international peacebuilding has rapidly expanded in the last two decades to respond to more multi faceted and complex conflicts the field has lagged behind in documenting the impact and success of projects To help address this gap the Alliance for Peacebuilding one of the leading networks in the field has brought together 13 stories of innovative peacebuilding practices from around the world in Building Peace While the projects covered are diverse in nature

together they demonstrate the significant impact of peacebuilding work Contributors created new institutions to prevent and manage conflicts at the local or national levels helped restore relationships in conflict affected communities and empowered citizens to work for positive change in their societies across ethnic religious and political divides It s clear that there is no quick fix for violence but this volume will go a long way in providing inspiration and practical tools for policymakers academics and practitioners who seek to make significant and valuable contributions towards achieving peace

Building for Peace II. William Albert Noyes,1924

Peace Education B. Jeannie Lum,2018-04-19 In 1999 the UN instituted the Program of Action on a Culture of Peace leading to the Declaration of the International Decade for the Promotion of a Culture of Peace and Non Violence for the Children of the World 2001 2010 This represented a paradigm shift away from the prevailing conceptualization of peace as the absence of war to one of creating cultures of peace and indicated a significant opening for peace educators and the expansion of their mission and field in peace research and scholarship This book seeks to address several questions about the emergence present state and future of the field of peace education and to ground the definition of the discipline in its origins origins deeply set in informal grassroots movements of concerned citizens faith based communities and professional organizations who work for peace as well as those working in formal institutions These origins are vital in imparting identity and in nurturing the current growing collective consciousness that combines the academic discipline and the worldwide peace movement a collective that can unify fuel and inspire dialogue among scholars researchers activists educators government leaders and the myriad of individuals committed to creating cultures of peace throughout the world This book was originally published as a special issue of the Journal of Peace Education

On Building Peace Michael Schulenburg,2025-10-01 Only 25 years after the end of the Cold War the Western dominated global order is fading and our hopes that liberal democracy would spread and bring world peace are evaporating While the West is increasingly preoccupied with its internal problems threats to global peace have fundamentally changed wars among nation states and their alliances once the dominant scourge of humankind have almost disappeared and are replaced by a triple threat from intra state armed conflicts the failing of nation states and the rise of belligerent non state actors The global peace we felt within our reach in 1991 is escaping us On Building Peace seeks the answers that the UN Charter can no longer provide Once meant as a guarantor for peace the Charter was never designed to deal with intra state conflicts and today its core principles are eroded The book makes two rather simple but possibly unpopular suggestions for preserving future peace first we must rescue the nation state not despite but because of globalization and second we must not further undermine the United Nations but expand its Charter for dealing collectively with this triple threat The struggle for survival in a world of limited resources and environmental degradation will deepen intra state conflicts We must prevent slipping back into a new round of Cold War type confrontations and focus on finding collective solutions for building peace For the sake of billions of people of future generations we cannot get this wrong
