Building Confidence In Outer Space Activities:

Space Activities of the United Nations and International Organizations, 1999 United Nations Disarmament Yearbook 2019 United Nations Office for Disarmament Affairs, 2020-06-16 The United Nations Disarmament Yearbook Volume 44 Part I 2019 is a compilation of the resolutions and decisions of the 74th session of the General Assembly their voting patterns in the General Assembly and the First Committee lead sponsors sponsors and co sponsors references to First Committee report and dates of adoption *Space India 2.0* Dr. Rajeswari Pillai Rajagopalan, Narayan Prasad, 2017-02-24 This book gives insights by providing a glimpse into the past while it connects with the present and delivers perspectives on the future dimensions of India's space programme The chapters cover a broad range Commercial NewSpace Space Policy Space Security International Cooperation and Space Sustainability Global Governance and they deliver educated suggestions and opinions to policymakers of the country to review their strategies on these issues Understanding expert opinions in these areas shall bestow the emerging managers of the space programme with holistic insights This work is a unique collection of thoughts and analyses on matters relevant to space policy and governance a good account of accomplishments and thought provoking puzzles on future possibilities The authors are national and international experts in different disciplines both veteran and young scholars and thus will be an invaluable resource for policymakers academic researchers and the public at large This work can also be a concrete step for continuing discourse on varied subjects or issues of importance which demand an interactive and evolutionary approach to progress on policy While there could be some differences in the positions taken by writers with reference to the views of some stakeholders in policymaking the academic yet non formal nature of the content in this book will hopefully create enough spaces for reflecting on a cohesive and harmonious framework of policy and its continued dynamism in a field where India can make significant contributions to national and global developments International Governance and the Rule of Law in China under the Belt and Road Initiative Yun Zhao, 2018-10-18 Evaluates the challenges and changes that the Belt and Road Initiative brings to China in international law and governance International Law, Security, and Military Power Howard Hensel, Carlos Alberto Leite da Silva, 2025-09-01 This book contributes to our understanding and appreciation of the contemporary relevance of international humanitarian law and international human rights law by analyzing and assessing the foundational norms principles and provisions contained within these bodies It also explores the ways in which they inform and condition military doctrine and the planning and the execution of military operations in the land air cyber and space domains as perceived through the lens of two of the most important military establishments in the Western Hemisphere the United States and Brazilian militaries The expert contributors promote a better awareness and comparative understanding of the rapidly changing diverse traditional and non traditional challenges and demands of the 21st century This volume will be useful to both scholars whose research focuses on international law and military professionals *Legal Aspects of Active Debris Removal* Zhuang Tian, 2025-07-21 The

quantity of space debris in Earth's orbit has already reached a concerning level threatening the safety of space activities. What makes this problem more pressing is that debris pieces generated by a collision can trigger further collisions and thus fragment other objects, a phenomenon known as the Kessler Syndrome. The growing need for active removal of space debris raises the question of whether the current international legal framework for space activities adequately regulates space debris removal and if not, what the gaps are and how they can be filled. This is what this groundbreaking book is about. The author provides in-depth analysis of such issues and topics as the following: the problem of space debris and issues surrounding the governance of active debris removal that demand answers from international space law; responsibility under international law to mitigate and remove space debris; international liability for damage caused by space objects and its implications for debris removal activities; eligibility under the current international legal framework to remove debris from other entities; legal restrictions on the use of active debris removal technologies, especially in view of their dual-use nature; apportionment of liability for damage caused among parties involved in a debris removal mission; and provision of information on the removability of space debris. To address the gaps, this book examines initiatives undertaken at national and international levels related to the governance of active debris removal and proposes recommendations for the further development of international space law, encapsulated in four keywords: commitment, safety, consent, and transparency. Space debris is a multidisciplinary issue that requires collective efforts within the international space community. This book provides a systematic analysis of the present and future of space law in regulating active debris removal. For legal scholars, it offers an understanding of the evolving landscape of active debris removal, its regulatory challenges, and the international legal framework that needs to keep pace with its development. For policymakers, it can provide insights into shaping the future development of international space law to better accommodate the regulatory needs of debris removal.
