ACTIVITY OF THINKING

DENNIS L. SEIFFER

Descartes Imagination Proportion Images The Activity Of Thinking

Eva Brann

Descartes Imagination Proportion Images The Activity Of Thinking:

Descartes's Imagination Dennis L. Sepper, 1996-01-01 A work of major importance for the interpretation of Descartes's development and for the understanding of the function of the imagination in Descartes's early works Descartes's Imagination will be a must in Descartes and imagination studies It is long overdue Eva T H Brann author of *The World of Imagination Sum and Substance* A significant contribution to our understanding of the development of Descartes's philosophy William R Shea author of *The Magic of Numbers and Motion The Scientific Career of Rene Descartes* **Feeling Our Feelings: What**

Philosophers Think and People Know Eva Brann, 2008-10-01 A dazzling wealth of stimulating reflection and wise insight To read *Feeling Our Feelings* is to relive one's own early moments of intellectual awakening with the all the advantages of age and experience Eva Brann proves to be a most steady and enlightening guide on an inquiry into the relation between life and thought that few have pursued so thoroughly Susan Shell Department of Political Science Boston College In *Feeling Our Feelings* Eva Brann considers what the great philosophers on the passions and feelings have thought and written about them She examines the relevant work of Plato Aristotle the Stoics Aquinas Descartes Spinoza Adam Smith Hume Kierkegaard and Heidegger and also includes a chapter on contemporary studies on the brain *Feeling Our Feelings* provides a comprehensive look at this pervasive and elusive topic *Feeling our feelings* comes from the words a little boy called Zeke said to me some thirty years ago when he was four I was swinging him in a park in Cambridge Massachusetts and not doing it right Swing me higher he said I want to feel my feelings The phrase stuck with me you might say it festered in my mind it agitated questions Why do we all want to feel our feelings so generally that people not in touch with them are thought to be in need of therapy What feeling was swinging high inducing Was it an exultation of the body or an exhilaration of the soul When he wanted to be feeling his feelings was there a difference between the general feeling the mere consciousness of being affected and his particular feelings the distinguishable affects as when you sing a song there is a difference between the singing done and the song sung or is there Eva Brann from her Preface **Reader's Guide to the History of Science** Arne

Hessenbruch, 2013-12-16 *The Reader's Guide to the History of Science* looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn *Imagination in the Later Middle Ages and Early Modern Times* Lodi Nauta, Detlev Pätzold, 2004 Imagination has always been recognised as an important faculty of the human soul As mediator between the senses and reason it is rooted in philosophical and psychological medical theories of human sensation and cognition Linked to these theories was the use of the imagination in rhetoric and the arts images had not only an epistemological role in transmitting information from the outside world to the mind's inner eye but could also be used to manipulate the emotions of the audience In this tradition with Cicero and

Quintilian as its auctoritates images were used to arouse and manipulate the emotions Both traditions had to be revalued in the seventeenth century with the advent of a mechanist Cartesian picture of human cognition and the physical world In spite of their usual suspicion of imagination which was commonly associated with illusions dreams and fiction seventeenth century philosophers realised that the imagination also had its place in mathematical scientific and philosophical thinking This volume number XII in the series Groningen Studies in Cultural Change offers the papers presented at a workshop on imagination organised by the editors in September 2002 It covers both the philosophical psychological as well as the humanist rhetorical traditions discussing key figures such as Kilwardby Lorenzo Valla Leon Battista Alberti Agricola Gianfrancesco Pico Erasmus Paracelsus Kepler Bacon Suarez Descartes and Spinoza but also treating hitherto neglected texts and writers such as Nicholas of Amsterdam and Jean Lemaire de Belges By focusing on the ever shifting ideas of the imagination as a philosophical and rhetorical tool this volume not only deepens our understanding of its central theme but also sheds new light on the thought and writings of these and other authors

International Philosophical Quarterly, 2002

Matter, Imagination, and Geometry Dmitrii Vladimirovich Nikulin, 2002 This book considers conditions of applicability of mathematics to the study of natural phenomena The possibility of such an application is one of the fundamental assumptions underlying the enormous theoretical and practical success of modern science Addressing problems of matter substance infinity number structure of cognitive faculties imagination and of construction of mathematical object Dmitri Nikulin examines mathematical geometrical objects in their relation to geometrical or intelligible matter and to imagination The author explores questions in the history of philosophy and science particularly in late antiquity and early modernity The focus is on key thinkers Plotinus and Descartes with the occasional appearance of Plato Aristotle Euclid Proclus Newton and others in whom the fundamental presuppositions of ripe antiquity and of early modernity find their definite expression

Mind's World Alexander M. Schlutz, 2009-06 As the mental faculty that mediates between self and world mind and body the senses and the intellect imagination is indispensable for modern models of subjectivity From Ren Descartes s Meditations to the aesthetic and philosophical systems of the Romantic period to think about the subject necessarily means to address the problem of imagination In close readings of Descartes Kant Fichte Hardenberg Novalis and Coleridge and with a sustained return to the origins of the discourse about imagination in Greek antiquity Alexander Schlutz demonstrates that neither the unity of the subject itself nor the unity of the philosophical systems that are based on it can be conceptualized without recourse to imagination Yet philosophers like Descartes and Kant must deny imagination any such

foundational role because of its dangerous connection to the body the senses and the unruly passions which threatens the desired autonomy of the rational subject The modern subject is simultaneously dependent upon and constructed in opposition to imagination and the resulting ambivalence about the faculty is one of the fundamental conditions of modern models of subjectivity History of Philosophy Quarterly ,1984* **CURRENT CONTENTS Arts & Humanities October 19,1997**
