Designing Communities Wolff-Michael Roth, 2012-12-06 The study described in this book arose in the context of a three year collective effort to bring about change in science teaching at Mountain Elementary School 1 This opportunity emerged after I contacted the school with the idea to help teachers implement student centered science teaching At the same time the teachers collectively had come to realize that their science teaching was not as exciting to children as it could be They had recognized their own teaching as textbook based with little use of the hands on approaches prescribed by the provincial curriculum At this point the teachers and I decided that a joint project would serve our mutual goals they wanted assistance in changing from textbook based approaches to student centered activities I wanted to collect data on learning in student centered knowledge producing classroom communities I brought to this school my new understandings about classroom communities from several earlier studies conducted in a private high school e.g. Roth Roth Roychoudhury 1992 I wanted to help teachers create science learning environments in which children took charge of their learning where children learned from more competent others by participating with them in ongoing activities and teachers were responsible for setting up and maintaining a classroom community rather than for disseminating information After I had completed the data collection for the present study I watched a documentary about an elementary school in the small French village of Moussac Envoye Special TV5 September 14 1994

Kendig, 2012-09-26 A Guide to Planning for Community Character adds a wealth of practical applications to the framework that Lane Kendig describes in his previous book Community Character The purpose of the earlier book is to give citizens and planners a systematic way of thinking about the attributes of their communities and a common language to use for planning

and zoning in a consistent and reliable way This follow up volume addresses actual design in the three general classes of communities in Kendig s framework urban suburban and rural The author s practical approaches enable designers to create communities with the character that citizens actually want Kendig also provides a guide for incorporating community character into a comprehensive plan In addition this book shows how to use community character in planning and zoning as a way of making communities more sustainable All examples in the volume are designed to meet real world challenges They show how to design a community so that the desired character is actually achieved in the built result The book also provides useful tools for analyzing or measuring relevant design features Together the books provide a comprehensive treatment of community character offering both a tested theory of planning based on visual and physical character and practical ways to plan and measure communities The strength of this comprehensive approach is that it is ultimately less rigid and more adaptable than many recent flexible zoning codes

Designing Community Margaret Embry,2009 ABSTRACT This research is an exploratory investigation of the potential of New Urbanist planning and design principles to create thriving and successful neighborhoods New Urbanism is an urban design movement started in the early 1980s that promotes the development of walkable compact and diverse neighborhoods It is the objective of this research to shed light on the value of creating a higher quality of life and more time for ourselves and our families I hypothesize that New Urbanism may pave the way for recapturing commute time for time with family creating authentic and successful communities and engaging with neighbors Furthermore by utilizing the design principles of New Urbanism traditional neighborhoods that re integrate the activities of daily living may be possible In short this research is an explanatory and exploratory investigation that examines whether incorporating the design principles of New Urbanism can create walkable and successful communities that promote community making with urban patterns that facilitate knowing neighbors communication among neighbors community activities and a long term sense of belonging This research focuses on three case studies of New Urbanism a large scale development in Atlanta Georgia with approximately 3 500 residents a moderate scale development in Tampa Florida with approximately 2 000 residents and a small scale development in Fernandina Beach Florida with approximately 700 residents These three case studies provide successful examples of the integration of the design principles of New Urbanism New Urbanism can be used as the stimulus for the types of neighborhoods Americans has been missing since World War II At each of these sites observations were made of the ways in which the design of the development has fostered community and created walkable and livable neighborhoods

Community Character Lane H. Kendig,Bret C. Keast,2012-06-22 The book Kendig

has written is a comprehensive treatment of community character and how and why this should be a primary consideration when zoning and regulating urban and rural areas Kendig states that community character presents a tested theory of planning based on visual and physical character that offers practical tools to measure and plan communities The strength of this book is that it provides tools to measure or analyze design issues It also differs from the existing books on the topic because it takes a more flexible approach to regulating design Smart Code has been very popular because it provides specifics on rezoning or doing overlay zoning for livability but it is very rigid LEED Neighborhood Development is still in its infancy pilot projects and is also prescriptive and flawed
